new movies 2025 disney plus: Film and Tourism Marco Valeri, 2025-04-01 Film tourism has emerged as a major driver of tourism development for many destinations. To date, there has been substantial literature on the subject, but little of it has engaged with the wider social science paradigm of culture, film and media research. The intellectual components of film tourism as an area of academic inquiry span several academic subjects such as marketing, economics, finance, psychology, social development, sustainability, and operations. Film is a relatively obscure area of tourism research, but the wider interconnections between tourism, space and media are beginning to be explored and understood. The interest which the topic has generated highlights this subject as one that is worthy of attention within both the academic community and in a practitioner context. The contributions in this book discuss the debates about the perceived and actual impact of film tourism and what must still be learned about this phenomenon to create the most unique and satisfying visitor experiences and protect the communities and environments that it affects. Fundamental questions are raised regarding the real demand for and draw of film as a tourism motivator, and the range of assumptions, conflicts, and contradictions that underlie them.

new movies 2025 disney plus: The Magic Kingdom and the Meaning of Life Adam Kadlac, 2025-09-02 What truths and life lessons can we take away from a seemingly trivial theme park in Orlando, Florida? Father and philosopher Adam Kadlac reflects on his own visits to Walt Disney World, arguing that Disney theme parks are a remarkably fruitful environment in which to reflect on the human condition. On the one hand, engagement with the worlds of Disney is a pervasive feature of many peoples everyday experience. On the other hand, the fantastical nature of Disney theme parks casts light on aspects of our lives that may otherwise seem unremarkable. If, on a day out at the Magic Kingdom, we pause to absorb our surroundings, our thoughts can quickly turn to all sorts of important topics and questions: authenticity and pleasure; what it means for corporations to play such a large role in our culture; whether nostalgia is always bad; and, of course, princesses (so, so many princesses. The Magic Kingdom and the Meaning of Life will challenge Disney lovers and sceptics alike to think more deeply about the things that matter to them.

new movies 2025 disney plus: The Question of Skill Adam J. Ledger, 2025-10-02 The Question of Skill offers a re-thinking of how theatre-making might be understood as a skilled craft and process, exploring how contemporary, professional contexts allow skill to emerge in a multitude of ways, often as a result of collective knowledge and collaboration. The book argues that notions of skill tend to be uncritically accepted to suggest abilities that are learnt and applied or associated with a particular and stable set of techniques. But skill is, instead, never a neutral term but suggests processes, values and systems. This study covers topics such as training, rehearsing and performing with a focus on the roles of the actor and director. As well as interdisciplinary theoretical perspectives, especially drawn from cognitive studies, it also discusses examples of skill as virtuosic performance. Throughout, the book draws on first-hand observations of international contemporary theatre-makers in rehearsal and performance, including the contemporary work of Katie Mitchell, Anne Bogart, Odin Teatret, the RSC, the National Theatre, and Encounter Productions. As well as diverse training, rehearsal and performance contexts, it includes *Fevered Sleep's Men & Girls Dance* (2016), Simon Stone's *Phaedra* (National Theatre, 2023) and Jan Fabre's *Mount Olympus: To Glorify the Cult of Tragedy* (2015). It probes how theatre is made as an always skilled, human endeavour, and, in a post-Covid age, what the future may bring.

new movies 2025 disney plus: Sensibilities and Emotion on Trans-Globalisation Era

Adrian Scribano, Silvia Cataldi, Fabrizio Martire, 2025-01-14 The Pandemic, the wars, the crisis of political institutions, and the expansion of the intensive use of social networks have impacted the elaboration of phantoms and fantasies that emerge from the modifications of the politics of the bodies and politics of emotions: today—what more than never?—the sensibilities are changing on a global scale. Emotions and politics of sensibilities registered in the current process of colonization of the inner planet imply the urgency of relieving the forms that its impacts acquire in the daily life of a global scale that becomes trans-globalization. Trans-globalization is characterized by the modification of three basic features of the structuring processes on a planetary scale: (a) the unnoticed acceptance of the global extension of the banalization of the good, the politics of perversion, and the logic of waste; (b) the return of the question/tension/paradox of sovereignty as a physical device for international mediation of virtual transnational commodification; and (c) the acceleration of the so-called energy transition.
