best netflix right now 2025: Oscar Bait Robert Boucaut, 2025-09-22 The Academy Awards – or the Oscars – have held a unique position in defining and enacting prestige for film industries and their publics. In evaluating 'the best' of film, they wield cultural influence over such cinema practices as consumption and evaluation, filmmaking aesthetics and narratives, and the discursive activity of Hollywood's industrial agents and audiences. Oscar Bait: The Academy Awards & Cultural Prestige offers a comprehensive insight into how a film or star positions one's self as a viable competitor worthy of such consecration in new media contexts. Based over three years of 'Oscars seasons' (2019–2021), rigorous analysis of film texts, awards telecasts, and circulating discursive media is built through an original scholarly framework for understanding modern cultural awards. Oscar Bait recontextualises the Oscars' complex legacy into a new media ecosystem, one in which their established value is undercut by declining broadcast viewership, the changing values and demands of global film publics, and influential discourses aiming to progress popular culture beyond its problematic histories. In this new paradigm of film production and consumption, Boucaut

explores what the Oscars mean in a contemporary filmmaking landscape and what impacts established stereotypes of Oscar-worthiness – the colloquial ‘Oscar Bait’ – continue to hold over the awards. *Oscar Bait* captures a dynamic snapshot of the Oscars and Hollywood in a critical era. It advances popular culture scholarship by developing an analytical framework for understanding disparate media texts within an awards season – and it critically updates Oscars knowledges for modern contexts. Readers interested in media and cultural studies, celebrity studies, persona studies, popular culture, and film will enjoy this book.

Gershon, 2025-01-27 The De Gruyter Handbook of Media Technology and Innovation brings together scholars from around the world to provide key insights on emerging technology trends and issues related to the fields of media management, information technology, product design planning and digital lifestyle. Major life transitions such as heading off to college, taking on a new job and moving to a new location have been documented extensively, often with accompanying recommendations, over the years. Leaving the family home and finding somewhere to live that presents shared living conditions is one of those life transitions for which no one has ever been properly trained. Drawing on 40 years of personal experience, as well as interviews with academics, psychologists and CEOs from around the world, this work is a springboard to harmonious shared living. Living with others involves situations that stump even the best therapists and life coaches, particularly if they've never had roommates.
