In the realm of music, the 1990s saw the rise of grunge, alternative rock, and the indie film scene. Grunge bands like Nirvana, Pearl Jam, and Soundgarden took the world by storm with their raw and emotional sound, while alternative rock bands like R.E.M., Red Hot Chili Peppers, and Radiohead gained mainstream success. reality tv shows to binge 2025: The American Mirage Eunji Kim, 2025-05-06 How the entertainment narrative of upward mobility distorts the harsh economic realities in America In an age of growing wealth disparities, politicians on both sides of the aisle are sounding the alarm about the fading American Dream. Yet despite all evidence to the contrary, many still view the United States as the land of opportunity. The American Mirage addresses this puzzle by exposing the stark reality of today's media landscape, revealing how popular entertainment media shapes politics and public opinion in an increasingly news-avoiding nation. Drawing on an eclectic array of original data, Eunji Kim demonstrates how, amid a dazzling array of media choices, many Americans simply are not consuming the news. Instead, millions flock to entertainment programs that showcase real-life success stories, such as American Idol, Shark Tank, and MasterChef. Kim examines how shows like these leave viewers confoundingly optimistic about the prospects of upward mobility, promoting a false narrative of rugged individualism and meritocracy that contradicts what is being reported in the news. By taking seriously what people casually watch every day, The American Mirage shows how rags-to-riches programs perpetuate the myth of the American Dream, glorifying the economic winners, fostering tolerance for income inequality, and dampening support for redistributive policies that could improve people's lives.

reality tv shows to binge 2025: American Mass Incarceration and Post-Network Quality Television Lee Flamand, 2025-10-01 Far more than a building of brick and mortar, the prison relies upon gruesome stories circulated as commercial media to legitimize its institutional reproduction. Perhaps no medium has done more in recent years to both produce and intervene in such stories than television. This unapologetically interdisciplinary work presents a series of investigations into some of the most influential and innovative treatments of American mass incarceration to hit our screens in recent decades. Looking beyond celebratory accolades, Lee A. Flamand argues that we cannot understand the eagerness of influential programs such as OZ, The Wire, Orange Is the New Black, 13th, and Queen Sugar to integrate the sensibilities of prison ethnography, urban sociology, identity politics activism, and even Black feminist theory into their narrative structures without understanding how such critical postures relate to the cultural aspirations and commercial goals of a quickly evolving TV industry and the most deeply ingrained continuities of American storytelling practices.
