upcoming book to movie adaptations 2025: New Approaches to Transcodification

Massimo Fusillo, Doriana Legge, Mirko Lino, Mattia Petricola, Gianluigi Rossini, 2025-08-04 This collection aims to renew our perspective on adaptation and intermedial processes by thinking of them in terms of codes rather than media. As a result, the notion of transcodification emerges as a crucial tool in order to study the circulation of semiotic and aesthetic resources across disciplines, knowledge systems, and cultures. Defined as the transfer of meaning-making potential from one semiotic domain to another, transcodification both includes and transcends intermediality, thus dramatically expanding the scope and research potential of adaptation and intermedial studies. The essays collected here apply this framework to an incredibly wide variety of objects and issues, from the relationship between art and historiography to the visual culture of finance, from contemporary approaches to ekphrasis to the hidden labor of screenwriters, from modern surveillance to digital comics, from fansubbing to the reception of the classical world in the digital age, from medieval theater to the role of videogames in the "war on terror". By fostering dialogue between radically different disciplines, the book offers a unique approach to the study of semiotic interrelations across the most diverse aspects of human culture.

upcoming book to movie adaptations 2025: Instant Stage Adaptations Ethan Parker, AI, 2025-03-29 Instant Stage Adaptations explores the rapidly growing trend of theatrical productions that quickly follow the release of popular films and books. This phenomenon reveals much about contemporary entertainment consumption, as audiences increasingly seek instant gratification through familiar stories brought to life on stage. These instant adaptations often compress the traditional development process, sometimes prioritizing spectacle over faithfulness to the original narrative, and are fueled by economic factors such as branding opportunities and audience demand. The book traces the evolution of stage adaptations, highlighting the shift from deliberate, years-long projects to today's rapid turnaround productions. It also examines the impact of social media and

evolving audience expectations on these adaptations. Analyzing case studies and incorporating interviews with industry professionals, *Instant Stage Adaptations* reveals how these productions are not merely opportunistic cash-ins but rather indicators of changing audience expectations and the increasing commodification of storytelling. Organized into three parts, the book first introduces core concepts and historical context. It then delves into specific adaptations, analyzing creative liberties and logistical challenges. Finally, it explores the economic and cultural implications, addressing the ethical considerations and potential for innovation within this evolving landscape of performing arts.

upcoming book to movie adaptations 2025: *The Digital Future of English* Simone Murray, 2025-07-18 More than any other academic discipline, literary studies is the creation of print culture. How then can it thrive in the digital era? Early 1990s predictions of the book's imminent demise presented a simplistic either/or choice between the legacy of moribund print and triumphalist digital technology. Yet we have grown to experience the two media as complexly interdependent and even complementary. Clearly, digital does not kill print. But literary studies in the digital era cannot simply resume business as usual. It is urgently necessary to reconsider the discipline's founding assumptions in light of digital technology. The digital era prompts a rethinking of literary studies' object of study, as well as its methods, theories, audiences and pedagogical practices. What counts as literature necessarily shifts in an age of proliferating born-digital texts and do-it-yourself (DIY) online publication. Where should literary studies sit institutionally, and how might it graft contextually-oriented social sciences methods onto its traditionally humanistic mode of textual analysis? Why should literary study continue to marginalize emotional responses to texts when online communities bond via readerly affect? Who is the audience for literary criticism in an age where expertise is routinely challenged yet communication with global book-loving publics has never been technologically easier? Finally, how can we utilize digital tools to rejuvenate literary studies pedagogy and help English staff better connect with millennial-age students? Literary studies has been convulsed for decades by debates over electronic literature and, more recently, digitally-aided 'distant reading'. But these discussions still mostly confine themselves to demarcating our proper object of study. We need to think more expansively about digital technology's impact on the underpinning tenets of the discipline. *Literary Media Studies* is pitched at fellow literary scholars, book historians, media theorists, cultural sociologists, digital humanists and those working at the interface of these converging disciplines. It models constructive engagement with contemporary digital culture. Most importantly, it brings a burst of sorely needed optimism to the question of literary studies' digital future.

upcoming book to movie adaptations 2025: *Still Reading Romance* Josefine Smith, Kathleen W. Taylor Kollman, 2025-04-01 In a world that commodifies feminism, is adapting romance novels for small and big screen projects, and the Romance Writers Association is evolving to a more inclusive representative group, it is imperative for researchers to reevaluate the cultural assumptions and gender norming work happening in the romance genre. It is time to question the cultural capital of traditional archetypes, explore the experience of romance readers, and question how romance and cultural studies researchers create quantitative, qualitative, and mixed methods research. This work centers around a data set collected with a revised version of Janice Radway's *Reading the Romance* survey that will be shared with all the authors of this anthology. By having access to this pool, authors will have the opportunity to explore different elements of reader experience and cultural norms in romance fiction, and potentially reflect on changes since Janice Radway's seminal work. The norms and negotiations readers experience while consuming romance is especially interesting as romancelandia becomes a more mainstream part of popular culture with the popularity of *Bridgerton* and romance series like *Ice Planet Barbarians* exploding on BookTok. No other book in romance or popular culture studies identifies a data set as the connecting element, and to do so creates an exciting opportunity to create a more inclusive study of popular romance, offer truly interdisciplinary research on the question of how readers read romance, and generate diverse areas of future scholarship. This edited volume explores multiple issues in romance fiction, based on survey data from real romance readers. An updated version of Janice Radway's influential

survey looking at romance readers in the early 1980s, this time scholars explore romance readers' habits and attitudes in the twenty-first century. Each contributor in this volume uses the same survey data to make unique statements about gender, intersectionality, popular fiction, and popular culture. By using a common data set but approaching it from different perspectives, this unique volume is able to apply multiple methodologies to the same subject.

upcoming book to movie adaptations 2025: Authenticity and Adaptation Christina Wilkins, 2025-02-24 This collection seeks to explore what authenticity means in the context of adaptation, whether there is such a thing as an authentic adaptation, and what authenticity can offer for adaptation. It does so through four specific sections, each thinking through related questions raised by the theme. By outlining theoretical approaches to authenticity, querying authorship's relationship to adaptation, the role of medium, and the place or value of the audience, this collection brings together a holistic perspective of authenticity that will intervene in the contemporary debates within adaptation. Authenticity's increasing importance in the zeitgeist filters through to adaptation, yet it is something that has not been explicitly debated or discussed within the field. As such, this collection both highlights and attempts to fill a gap in scholarship.
