

lose 30 pounds in 30 days intermittent fasting

lose 30 pounds in 30 days intermittent fasting is an ambitious goal, but one that many are exploring as a powerful strategy for rapid weight loss. Intermittent fasting (IF) is not a diet in the traditional sense, but rather an eating pattern that cycles between periods of voluntary fasting and non-fasting. When combined with a strategic approach, it can unlock significant fat-burning potential. This article will delve deep into how to effectively implement intermittent fasting to achieve substantial weight reduction in a compressed timeframe, focusing on safe and sustainable methods. We will explore the science behind IF, various fasting protocols, essential dietary considerations, exercise integration, and potential pitfalls to avoid when aiming to lose 30 pounds in 30 days.

Understanding Intermittent Fasting

Intermittent fasting is an eating framework that defines when you eat, rather than what you eat. It involves alternating between specific periods of eating and voluntary fasting. Unlike conventional diets that restrict calorie intake or specific food groups, IF focuses on the timing of your meals. This approach can be tailored to individual lifestyles and preferences, making it a flexible tool for many seeking to manage their weight and improve metabolic health. The core principle is to allow your body extended periods without food, which can trigger beneficial physiological changes.

The popularity of intermittent fasting has surged due to its reported effectiveness in weight loss and its potential health benefits, which extend beyond just shedding pounds. By strategically structuring your eating window, you can influence your body's hormonal balance, making it more efficient at accessing stored body fat for energy. This makes the goal of losing 30 pounds in 30 days with intermittent fasting a realistic consideration for many, provided it is approached with careful planning and an understanding of its underlying mechanisms.

The Science of Fat Loss with Intermittent Fasting

The primary mechanism through which intermittent fasting promotes fat loss is by influencing

insulin levels. When you eat, your body releases insulin to help transport glucose from your bloodstream into your cells for energy. If you consistently consume food throughout the day, your insulin levels remain elevated, which can inhibit fat breakdown. During fasting periods, insulin levels drop significantly, signaling your body to tap into stored fat reserves for fuel. This metabolic shift is crucial for achieving a calorie deficit necessary for weight loss.

Furthermore, intermittent fasting can increase levels of human growth hormone (HGH), a hormone that plays a vital role in muscle preservation and fat metabolism. Elevated HGH during fasting periods can help protect lean muscle mass while promoting lipolysis, the breakdown of fats. This dual action of reducing fat storage and increasing fat burning contributes significantly to effective weight reduction. By extending the time between meals, you encourage your body to become more efficient at utilizing its fat stores, thus accelerating the process of losing 30 pounds in 30 days.

Hormonal Shifts and Their Impact

Beyond insulin and HGH, intermittent fasting also impacts other hormones involved in appetite regulation and metabolism. Norepinephrine, a stress hormone, is released during fasting, which can further boost metabolism and encourage the breakdown of fat. Leptin, the satiety hormone, can also become more sensitive with IF, leading to better appetite control and reduced cravings. These hormonal adjustments work synergistically to create an environment conducive to fat loss, making the ambitious goal of losing 30 pounds in 30 days more achievable.

Autophagy and Cellular Repair

While not directly tied to immediate weight loss, intermittent fasting also stimulates a cellular repair process called autophagy. During autophagy, your body removes damaged cells and regenerates newer, healthier ones. This process, activated during prolonged fasting periods, can contribute to overall metabolic health and potentially improve insulin sensitivity, indirectly supporting weight loss efforts over the long term. It's a comprehensive approach that benefits the body on multiple levels.

Popular Intermittent Fasting Protocols for Weight Loss

Several intermittent fasting methods can be employed to target weight loss. The choice of protocol often depends on individual lifestyle, work schedules, and personal preferences. For a goal as ambitious as losing 30 pounds in 30 days, consistent adherence and understanding the nuances of each method are paramount.

The 16/8 Method

The 16/8 method is perhaps the most popular and sustainable IF approach. It involves fasting for 16 hours each day and restricting your eating window to 8 hours. For instance, you might eat between

12 PM and 8 PM, fasting from 8 PM until 12 PM the next day. This method is relatively easy to incorporate into daily life and allows for three regular meals within the eating window. The extended fasting period helps lower insulin levels and allows the body to access stored fat.

The 5:2 Diet

The 5:2 diet involves eating normally for five days of the week and restricting calorie intake to around 500-600 calories on two non-consecutive days. While not strictly a fasting protocol, the significant calorie reduction on fasting days creates a weekly calorie deficit, promoting weight loss. This method requires careful planning of nutrient-dense, low-calorie meals for the fasting days to ensure adequate nutrition and satiety.

Eat-Stop-Eat

Eat-Stop-Eat involves a voluntary 24-hour fast once or twice a week. For example, you might finish dinner on Monday and not eat again until dinner on Tuesday. This method provides a significant fasting window, allowing for substantial insulin reduction and fat burning. It can be more challenging than the 16/8 method and may require some adjustment to get used to longer fasting periods.

Alternate-Day Fasting

Alternate-day fasting involves alternating between days of normal eating and days of fasting or significant calorie restriction. Some variations allow for a small intake of calories (around 500) on fasting days. This protocol can lead to rapid weight loss but is generally considered more intense and may not be suitable for everyone, especially beginners aiming to lose 30 pounds in 30 days.

Developing a Sustainable Eating Plan for Fasting Days

While intermittent fasting dictates when you eat, what you eat during your eating window is crucial for achieving effective and sustainable weight loss. To lose 30 pounds in 30 days, your food choices must be nutrient-dense, satiating, and support a calorie deficit. Focusing on whole, unprocessed foods will provide the essential vitamins, minerals, and fiber your body needs.

Prioritize lean protein sources, such as chicken, fish, tofu, and legumes. Protein is highly satiating and helps preserve muscle mass, which is important for metabolism. Include plenty of non-starchy vegetables like leafy greens, broccoli, and bell peppers, which are low in calories but high in volume and nutrients. Healthy fats from avocados, nuts, seeds, and olive oil are also important for satiety and hormone production.

Nutrient-Dense Meal Examples

- **Breakfast (if applicable within eating window):** Scrambled eggs with spinach and avocado, or a Greek yogurt parfait with berries and nuts.
- **Lunch:** Large salad with grilled chicken or salmon, mixed greens, colorful vegetables, and an olive oil-based dressing.
- **Dinner:** Baked cod with roasted asparagus and a small portion of quinoa, or lentil soup with a side of whole-grain bread.
- **Snacks (if needed):** A handful of almonds, a hard-boiled egg, or a small apple with a tablespoon of almond butter.

Calorie Deficit Considerations

Even with intermittent fasting, a calorie deficit is necessary to lose 30 pounds in 30 days. While IF can help create this deficit naturally by reducing eating opportunities, it's still important to be mindful of portion sizes and calorie-dense foods. Calculate your estimated daily calorie needs for weight loss and aim to consume slightly fewer calories within your eating window. This doesn't mean drastic restriction, but rather making informed choices about food quality and quantity.

Hydration and Electrolyte Balance During Fasting

Staying adequately hydrated is absolutely critical during intermittent fasting, especially when aiming for significant weight loss in a short period. Water plays a vital role in numerous bodily functions, including metabolism, detoxification, and appetite regulation. Drinking plenty of water can also help manage hunger pangs during fasting periods.

During longer fasting windows, you may also need to consider electrolyte balance. As you reduce food intake, you may lose essential electrolytes like sodium, potassium, and magnesium. These are crucial for nerve function, muscle contractions, and maintaining fluid balance. Dehydration and electrolyte imbalances can lead to fatigue, headaches, and muscle cramps, which can derail your efforts to lose 30 pounds in 30 days.

Safe Hydration Practices

- **Water:** Drink plenty of plain water throughout the day, both during your eating window and your fasting periods.

- **Herbal Teas:** Unsweetened herbal teas are also a good option and can provide variety.
- **Black Coffee:** Black coffee, without sugar or cream, is generally permissible during fasting and can help boost metabolism.
- **Electrolyte Supplements:** If you experience symptoms of electrolyte imbalance, consider a natural electrolyte supplement or consume electrolyte-rich foods like bananas (potassium) or leafy greens (magnesium) within your eating window.

Avoid sugary drinks, sodas, and juices, as these will break your fast and can lead to unwanted calorie intake and blood sugar spikes. Diligent hydration is a cornerstone of successful intermittent fasting and overall health.

Incorporating Exercise for Optimal Results

While diet and fasting are primary drivers of weight loss, integrating exercise can significantly amplify your results, especially when aiming to lose 30 pounds in 30 days. Exercise not only burns calories but also helps build lean muscle mass, which can boost your resting metabolic rate, making it easier to burn more calories even at rest. A combination of cardiovascular exercise and strength training is ideal.

Cardiovascular exercises like brisk walking, jogging, cycling, or swimming are excellent for burning calories and improving cardiovascular health. Aim for at least 150 minutes of moderate-intensity cardio per week. Strength training, which involves lifting weights or using resistance bands, is crucial for building and maintaining muscle mass. Muscle tissue burns more calories than fat tissue, so increasing your muscle mass can significantly enhance your metabolism and contribute to faster fat loss.

Timing of Exercise with Fasting

The timing of your workouts in relation to your fasting periods can be a strategic consideration. Some individuals find that exercising during a fasted state can enhance fat burning, as your body may have already depleted its glycogen stores and is more readily accessing fat for fuel. However, this depends on the intensity of the workout and your individual tolerance. For intense workouts, it might be more beneficial to exercise closer to or within your eating window to ensure you have adequate energy and can refuel afterward.

Listen to your body. If you feel overly fatigued or lightheaded when exercising in a fasted state, adjust your schedule. It's better to perform a moderate workout consistently than to push yourself too hard and risk injury or burnout. A balanced approach that considers both your fasting schedule and your exercise routine will maximize your chances of achieving your goal of losing 30 pounds in 30 days.

Potential Challenges and How to Overcome Them

Embarking on a journey to lose 30 pounds in 30 days using intermittent fasting is a significant undertaking, and it's natural to encounter challenges along the way. Understanding these potential hurdles and having strategies to address them can greatly improve your adherence and success rate.

Hunger and Cravings

One of the most common challenges is managing hunger and cravings, especially in the initial stages of intermittent fasting. Your body may take time to adjust to longer periods without food. Staying well-hydrated can help significantly, as thirst can often be mistaken for hunger. Focusing on nutrient-dense foods with plenty of fiber and protein during your eating window will promote satiety and reduce the likelihood of intense cravings. Distraction techniques, such as engaging in a hobby, going for a walk, or having a conversation, can also be effective when a craving strikes.

Fatigue and Headaches

Some individuals experience fatigue and headaches, particularly in the first few days of starting intermittent fasting. This is often due to changes in blood sugar levels and potentially mild dehydration or electrolyte imbalances. Ensuring adequate hydration, including incorporating electrolytes if needed, can mitigate these symptoms. As your body adapts to using fat for energy, these symptoms typically subside.

Social Situations and Meal Planning

Social events and family meals can present challenges when adhering to a strict eating window. Planning ahead is key. Communicate your eating schedule to friends and family if you feel comfortable doing so. If attending a dinner party, try to schedule your eating window to coincide with the event, or be prepared to politely decline food if it falls outside your fasting period. Having healthy, portable snacks within your eating window can also be helpful for managing hunger between meals.

Consistency and Plateaus

Maintaining consistency is vital for achieving significant weight loss. There may be days when sticking to your plan feels difficult. Remind yourself of your goals and the benefits of intermittent fasting. Plateaus in weight loss are also normal. If you find your progress has stalled, reassess your food intake, exercise routine, and sleep quality. Small adjustments to your fasting window or calorie intake might be necessary to break through a plateau.

Monitoring Progress and Adjusting Your Strategy

To effectively lose 30 pounds in 30 days with intermittent fasting, consistent monitoring of your progress and the flexibility to adjust your strategy are essential. Tracking your weight, measurements, and how you feel provides valuable insights into what is working and what may need modification.

Regular weigh-ins (perhaps once a week) can give you a clear picture of your weight loss trajectory. However, it's important to remember that daily fluctuations are normal due to water retention and other factors. Taking body measurements (waist, hips, arms) can offer a more nuanced view of fat loss, as you might be losing inches even if the scale isn't moving significantly. Keeping a journal of your food intake, fasting periods, exercise, and how you feel can help identify patterns and triggers for success or struggle.

When to Adjust Your Plan

If you are consistently following your intermittent fasting protocol, eating nutrient-dense foods, exercising, and not seeing the desired progress after a couple of weeks, it might be time to make adjustments. This could involve slightly extending your fasting window, adjusting the types of food you consume during your eating period, or re-evaluating your calorie intake. It's also important to ensure you are getting adequate sleep, as poor sleep can negatively impact hormone balance and weight loss.

Conversely, if you are experiencing extreme fatigue, dizziness, or other concerning symptoms, it is crucial to pause and reassess. Pushing your body too hard can be counterproductive and unhealthy. The goal is sustainable weight loss, not just rapid reduction that comes at the expense of your well-being.

Ensuring Safety and Consulting Professionals

While intermittent fasting can be a powerful tool for weight loss, it is imperative to approach it with safety as the top priority, especially when aiming for ambitious goals like losing 30 pounds in 30 days. Not everyone is a suitable candidate for intermittent fasting, and certain medical conditions or life stages require careful consideration and professional guidance.

Individuals with a history of eating disorders, pregnant or breastfeeding women, individuals with diabetes (especially those on medication), or those with chronic health conditions should consult with a healthcare professional before starting intermittent fasting. A doctor or a registered dietitian can assess your individual health status, discuss potential risks and benefits, and help you develop a safe and personalized plan.

Furthermore, even for healthy individuals, paying close attention to your body's signals is crucial. If you experience any severe adverse effects, such as persistent dizziness, extreme weakness, or

significant mood changes, it is essential to stop fasting and seek medical advice. The pursuit of losing 30 pounds in 30 days should not compromise your overall health and well-being. A balanced and informed approach, often with professional support, ensures that your weight loss journey is both effective and safe.

Q: Is it realistic to lose 30 pounds in 30 days with intermittent fasting alone?

A: Losing 30 pounds in 30 days is a very aggressive weight loss goal. While intermittent fasting can be a powerful tool for creating a calorie deficit and promoting fat loss, achieving such a rapid reduction solely through IF might be challenging and potentially unhealthy without significant dietary changes and increased physical activity. It's generally recommended to aim for a more sustainable weight loss of 1-2 pounds per week.

Q: What is the safest intermittent fasting protocol for a beginner aiming for rapid weight loss?

A: For beginners, the 16/8 method is often recommended due to its relative simplicity and sustainability. It involves a 16-hour fasting window and an 8-hour eating window. For rapid weight loss, consistency is key, but safety should always be the priority. It's advisable to start with shorter fasting periods if needed and gradually increase them, while also focusing on nutrient-dense foods.

Q: Can I drink coffee or tea during my intermittent fasting window?

A: Yes, typically black coffee and unsweetened herbal teas are permissible during your fasting window. These beverages contain very few calories and can help suppress appetite and boost metabolism. However, avoid adding sugar, milk, cream, or artificial sweeteners, as these will break your fast.

Q: What should I eat during my eating window to maximize fat loss while intermittent fasting?

A: To maximize fat loss, focus on whole, unprocessed, nutrient-dense foods. Prioritize lean proteins (chicken, fish, tofu), plenty of non-starchy vegetables, healthy fats (avocado, nuts, seeds, olive oil), and complex carbohydrates (quinoa, sweet potatoes) in moderation. Ensuring adequate protein and fiber will help you feel satiated and support muscle maintenance, which is crucial for metabolism.

Q: Will intermittent fasting help me lose 30 pounds in 30 days

if I don't change my diet?

A: While intermittent fasting can create a calorie deficit by limiting your eating opportunities, it's unlikely to lead to a 30-pound weight loss in 30 days without also making significant improvements to your diet. The quality of food consumed during your eating window plays a crucial role in overall calorie intake, nutrient absorption, and satiety. A poor diet, even within an IF schedule, can hinder weight loss progress.

Q: Are there any side effects of intermittent fasting when trying to lose weight quickly?

A: Common side effects can include hunger, headaches, fatigue, irritability, and difficulty concentrating, especially in the initial stages. For more rapid weight loss attempts, these side effects might be more pronounced. It's important to stay hydrated, ensure adequate electrolyte intake, and listen to your body. If symptoms are severe or persistent, consult a healthcare professional.

Q: How does exercise fit into losing 30 pounds in 30 days with intermittent fasting?

A: Exercise is a vital component for both health and accelerating weight loss. Combining intermittent fasting with regular physical activity, including both cardiovascular exercise and strength training, can significantly enhance calorie expenditure and boost metabolism. This synergistic approach will greatly improve your chances of achieving ambitious weight loss goals like losing 30 pounds in 30 days.

Q: What if I experience extreme hunger during my fasting period?

A: Extreme hunger can be managed by ensuring you are adequately hydrated with water, black coffee, or herbal tea. Consuming nutrient-dense, satiating foods high in protein and fiber during your eating window can also help reduce hunger during fasting periods. If hunger is overwhelming and unsustainable, you may need to adjust your fasting window to a more manageable duration.

Q: Is it safe for everyone to try and lose 30 pounds in 30 days using intermittent fasting?

A: No, it is not safe for everyone. Individuals with a history of eating disorders, pregnant or breastfeeding women, people with diabetes (especially those on medication), and those with certain medical conditions should not attempt aggressive weight loss or intermittent fasting without strict medical supervision. Consulting a healthcare provider is always recommended before starting any significant dietary or lifestyle changes.

lose 30 pounds in 30 days intermittent fasting: *How to Lose 30 Pounds (Or More) in 30 Days with Juice Fasting* Robert Dave Johnston, 2014-11-11 Juice fasting is a powerful discipline that, if practiced regularly (and correctly), can help overweight people lose extravagant amounts of weight in a very short period of time. In addition, juice fasting (with the rich nutrients in fruits and vegetables, detoxifies the digestive system and the entire body, thus keeping you lean, health and energized. Juice fasting can also help you to look younger and more vibrant; it isn't uncommon for a person to say that they look ten years younger thanks to regular juice fasting. Yes, fasting has anti-aging, life-extension and disease resistant properties that can transform your life above and beyond any expectations. Give Juice Fasting a try; you will love it. In this edition I have included 50+ of my favorite juicing recipes for your enjoyment. The task at hand isn't easy. But neither is it easy to do nothing, right? A little fasting sacrifice versus, in the future, a potential chronic disease. Indeed, ours is the easiest and softest path. I hope you join us.

lose 30 pounds in 30 days intermittent fasting: How to Lose 40 Pounds (Or More) in 30 Days With Water Fasting Robert Dave Johnston, 2014-11-22 This book covers water fasting from a to z. I've thrown the kitchen's sink to make sure that you have all of the information, tips, tricks and procedures needed to go all the way and achieve your goals. I have left no rock unturned; this book can transform your life beyond what you can imagine. I myself was obese, sick, depressed and suicidal for many years. Water fasting was one of the most important elements of my recovery. It isn't easy; in fact, fasting can be tough. But, with some practice, the discomfort does wane and you'll find yourself feeling better, sharper, younger and leaner than ever before. If you're looking for an all-inclusive plan to lose weight, detoxify and reclaim your health, this book will help you in tremendous ways.

lose 30 pounds in 30 days intermittent fasting: The Intermittent Fasting Weight Loss Formula Robert Dave Johnston, 2014-09-21 This book is Volume 2 of the series, *How To Lose Weight Fast , Keep it Off & Renew The Mind, Body & Spirit Through Fasting, Smart Eating & Practical Spirituality*. Intermittent fasting has become an increasingly-popular way to lose weight quickly without having to commit to long-term diets. But most people who practice intermittent fasting are merely scratching the surface. Author, Robert Dave Johnston, fasting coach and webmaster of FitnessThroughFasting.com, presents the powerful five-prong intermittent fasting system that helped him overcome obesity, lose 100 pounds and, more importantly, keep it off for more than 10 years. And here's the good news: The weight loss numbers provided by intermittent fasting are very doable. Whether you only need to lose a few pounds, or if you are an athlete seeking for ways to reduce body-fat, or if you are overweight or even seriously obese, the intermittent fasting machine can help you take a quantum leap towards the TOTAL attainment of your goals. I'm not talking about losing 'some' of the weight. With intermittent fasting, you can lose ALL of the weight in a very short period of time. For instance, by cutting out some foods from your diet and then practicing periods of fasting of just a few hours per week (for starters), it is possible to lose weight very quickly. How much? A 4-hour fast, 3 times per week can actually produce weight loss of 7-to-10 pounds per month (or more, depending on your body makeup and what you eat). How would it help you to lose ten quick pounds in a month? I'm sure it would help you a lot, not to mention that you will feel empowered and encouraged to keep going because you will see results quickly and consistently. And this is just the beginning. In 'The Intermittent Fasting Weight Loss Formula, the author goes all-out

and presents a powerful five-prong intermittent fasting structure that can supercharge weight loss and propel you towards your ultimate goal. And it can do this faster than anything else on the face of this earth. The five intermittent fasting methods presented in this book can literally change the course of your life. How will it feel to actually lose ALL of the weight and be able to get into those pants you used to wear in high school? Or how will it feel to simply feel good about yourself and not have to turn away when you see yourself in a mirror? Reaching a cherished weight loss goal is an exhilarating, emotional and deeply transforming experience. Here are some Intermittent Fasting examples: * Daily Intermittent Fasting asks the faster to eat a light breakfast at 8AM and then not eat anything else (only water) until 8PM that evening, totaling 12 hours of fasting. Doing that for several days, weeks or even months can, in itself, help you achieve your weight loss goals. Intermittent fasting for 12 hours daily is simple on the surface. However, within it, there is tremendous power to rejuvenate and heal. And that's just intermittent fasting for 12 hours daily, from 8AM to 8PM. Twelve hours daily of fasting for thirty days can very well transform the course of your life. And that is only the simplest Intermittent Fasting structure the author presents. Want to push yourself a little more for some extra (and faster) weight loss? Try the Mid-week Intermittent fasting method, where you fast for 3.5 days every week for one-to-three months. Or you can dive into deep waters and practice what the author calls the 7-Day fat buster intermittent fasting method. Moreover, the author gives instructions on how you can actually combine all of the intermittent fasting methods and create a super-charged fat-burning and detoxification cycle that will cause the pounds to literally melt off of your body. But that's not all. To help you break the fast properly and maximize the health and weight loss benefits, the author will give you a list of banned foods, as well as a shopping list of clean foods that will support (and not sabotage) your progress.

lose 30 pounds in 30 days intermittent fasting: Intermittent Fasting For Women Ashley Dawson, 2019-09-12 ☐☐ The Ultimate 30 Day Diet to Burn Body Fat & Sculpt An Amazing Body Fast! Your Weight Loss Surgery Alternative!☐☐ Are you ready to become the greatest version of yourself?! Are you tired of being bombard by all these new diet fads that simply don't work? Have you tried losing weight before but gave up because you never achieve any results? Uncover the science of long term sustainable weight loss that has been proven to work and used since ancient times! I reveal the truth and the insidious secretes the food industry and corporations want to hide from you. In my book I go straight to the facts at hand and help you understand your body at a more deeper level and teach you how to leverage wholefoods to promote weight loss. If your sick and tired of how you look, belly fat,

lose 30 pounds in 30 days intermittent fasting: Detoxify Your Body, Lose Weight, Get Healthy & Transform Your Life - Volumes 1-3 Robert Dave Johnston, 2014-09-21 This book is a compilation of Volumes 1-3 of the series 'Detoxify Your Body, Lose Weight, Get Healthy & Transform Your Life.' This dynamic collection is comprised of: Volume 1- The 10-Day 'At Home' Colon Cleansing Formula - Details a simple yet very powerful holistic remedy that, in essence, forcefully expels toxic buildup and debris from the colon, freeing the body of rotten and putrefied waste that, in some cases, hitch a ride in a person's body for months... even years. Since disease begins in the colon, this remedy, when done correctly, can zap any sickness that tries to hide in the colon and digestive system. The time is NOW to destroy all of the toxic fecal matter that threatens your health and future. The 10-Day 'At Home' Colon Cleansing Formula will show you what to do so that you can solve the problem and recapture the optimal health that you deserve. Volume 2 - Bug Off! A 30-Day Parasite, Liver, Kidney Detox & Weight Loss Plan - In this edition, the author details a simple yet effective cleansing diet that can produce 20 pounds (or more) of weight loss in one month, as well as a three-phase plan to destroy parasites and detoxify the liver and kidneys. This step-by-step manual includes sample menus and a list of foods to avoid, in addition to detailed instructions on how to prepare the various detoxification remedies and carry them out. Furthermore, the author offers motivation, inspiration and tips to help the reader make permanent eating-habit and lifestyle changes. If you want to lose weight and improve your health and quality of life, this dynamic program can help you go the distance and achieve all of your goals. Volume 3- Lose Weight Fast &

Detoxify With Intermittent Fasting & At-Home Coffee Enemas - This book outlines a powerful step-by-step holistic program of intermittent fasting and coffee enemas to help produce maximum weight loss and deep bowel detoxification. The regimen includes pre-fast preparation menus, meal ideas and a 20-hour daily fasting structure accompanied by night time meals and snacks. Following the instructions as outlined, it is not unusual to lose anywhere from 7-10 pounds weekly (or more). Detox symptoms are discussed, along with tips on how to overcome them. If you are seeking to lose weight fast and drastically improve the quality of their health, this book gives you the structure, directions and motivation to go all the way. For more weight loss support and motivation, join us at the community forum www.fitnesssthroughfasting.com

lose 30 pounds in 30 days intermittent fasting: The Permanent Weight Loss Diet Robert Dave Johnston, 2014-09-21 The Permanent Weight Loss Diet is Volume 1 of 7 of the series How To Lose Weight Fast, Keep it Off & Renew The Mind, Body & Spirit Through Fasting, Smart Eating & Practical Spirituality. This book provides detailed instructions on how to launch a simple yet very effective and powerful structured eating plan that can solve your weight loss issues. The reason why most people start a diet and fail is because they are either unwilling or unprepared to walk through the inevitable hunger and discomfort. However, through proper preparation, and armed with a solid eating structure, nothing can stop you from reaching your objectives. If you are tired of jumping from one diet to another and not reaching your goals, then the Permanent Weight Loss Diet is sure to motivate, inspire and lead you to the attainment of your weight loss goals.

lose 30 pounds in 30 days intermittent fasting: How To Lose Weight (And Keep it Off) By Reprogramming The Subconscious Mind Robert Dave Johnston, 2014-09-21 * Would you like to start a diet, stick to it, and lose ALL of the weight you wanted? * Would you like to NOT gain the weight back and remain thin for many years to come? * Would you like to easily say NO to junk food and other foods that you formerly could not resist? * Would you like to be able to make healthy eating choices at all times without struggle or feeling deprived? * Would you like to master your belly and appetites and NEVER be a slave to food and eating? * Would you like to find the inner strength to always make the best choices for you, even if those choices require a bit of sacrifice and/or discomfort? * In short, would you like to SOLVE the weight problem once and for all and enjoy your life thin and with a healthy relationship with food? Helping you to accomplish all of these points is what this book is all about. Here's the bottom line: I was stuck in obesity and binge eating for more than 20 years, during which time I 'trained' myself to believe and act upon all sorts of destructive and negative nonsense. I ate everything and anything that the mind and belly wanted. Even if I was full and my belly felt that it was about to pop, I would continue to eat nonetheless. Food was my drug. I had ZERO ability to resist food; I always gave in. I was completely trapped; overeating day after day, becoming more and more obese and sick, isolated from life and the world and filled with shame, guilt, depression and intense self-hatred. I was, in essence, trapped in a self-made prison where food was the ultimate overseer and lord. It was a vicious cycle: Sadness, rage and self-pity fueled more overeating which, in turn, caused more failure and negativity, which caused more overeating. I was perpetually sabotaging my weight loss efforts, often without realizing it, because pain and unhappiness had (tragically) become second nature. THEN I realized that if I wanted to be free of this poisonous mental chatter, I would have to work at identifying (and overwriting) the conscious and subconscious fat patterns that fed the insanity and kept me eating in excess and at the wrong times; the patterns that made me weak in the sight of food and caused me to always be nibbling, grazing and eating, eating and eating. I was fed up and wanted to overcome obesity once and for all. I had to create a new mental program that supported and facilitated my goals rather than destroy them. And none of this is breaking news. We've all heard of positive thinking, affirmations and visualizations. Here I take those powerful mental tools and apply them directly to weight loss, food and eating. If you have tried to lose weight and fallen short, then implementing the simple but powerful program I outline here will help you to make measurable progress. If you are willing to walk with me and do some work, then this book can become a very powerful ally in your journey towards permanent weight loss. You will be asked to do some

introspective work in a journal. You will be asked to put together a reprogramming program tailored specifically to your individual needs and situation. If you give yourself to this work and stick to it as I recommend, there is no doubt that you will begin to see some remarkable changes in the way you relate to food and eating. I had big problems waking up at 3AM and raiding the fridge. After some weeks of following this program, I went to sleep one night and, when I woke up, it was 6AM. I had not gotten up to eat! One lady that was addicted to cream donuts and double sweet latte wrote to tell me that, after following this program, she abruptly stopped. A guy who lived on pizza and beer said that after listening to the tapes for a few weeks, he woke up one morning and decided to change his diet. And, you, too can experience the breakthrough IF you make the commitment with yourself.

lose 30 pounds in 30 days intermittent fasting: Binge Free - Triumph Over Binge Eating

Robert Dave Johnston, 2013-07-19 In Binge Free, I present the story of my descent to the depths of hell with binge-eating disorder, my journey back to humanity and the various mental techniques and lifestyle changes that helped me to overcome 25 years of isolation, depression and bingeing insanity. While this killer sickness caused me to lose my humanity, dignity and hope for life, I managed to escape and, through hard work and determination, have found restoration, peace and happiness. If there be any reason for me to still live, I hope that it's to reach-out to others who suffer and share with them the tools that helped me to recover, and have kept me binge free for ten years. My message is that you, too, can attain this freedom. Binge eating is a sickness that lives in the mind and uses our own thoughts, feelings and memories to entice and trap us. Therefore, to achieve long-term recovery, it is imperative to have a suitable arsenal of mental strategies to counterattack, expose the lies and say NO to bingeing. Together with a series of lifestyle changes that I suggest, this book gives you the goods straight from the experience of a food addict that survived the assault of binge-eating disorder. I hold nothing back and give you practical tips and tools that you can put to use right away so that you can learn to vanquish the binge eating monster once and for all.

lose 30 pounds in 30 days intermittent fasting: Intermittent Fasting for Women and Ketogenic Diet for Women Jimmy Fung, Amy Sanders, 2019-10-27 Just when you thought no more new weight loss plans could exist, this one comes along... The air begins to feel warmer on your skin, and the season reaches its turn of the tide as summer makes its way to greet you kindly. You decide it's time to bust out the shorts, and when you've slid in one leg, then the other, and go to button up... No, that can't be right! They just fit me last year! Whether you've been struggling with your weight for the majority of your life, or you've gained for whatever reason, and you want to get rid of those extra, unnecessary pounds, it can be frustrating to find something that genuinely works. Refrain from falling into the dark rabbit hole of yo-yo dieting and programs claiming you will lose X number of pounds within the next week. If these claims are not bogus, they are definitely very unhealthy. According to Healthy, yo-yo dieting or crash dieting can have major side effects on your health, causing: □Weak bones □A lower metabolism □Higher body fat and increased weight gain over time □A greater risk of developing diabetes and heart disease □Mental disruptions, such as depression or the development of eating disorders Do your mind and body a favor and follow a nutritious weight loss plan that won't leave you undernourished or feeling weak. In Intermittent Fasting for Women and Ketogenic Diet for Women, you will discover: □How and why combining intermittent fasting and the keto diet makes for the ultimate, fool-proof weight loss method □The best way to tackle your diet plan to ensure consistency, overcome plateaus, and achieve your goal weight □Any roadblocks you may face during your diet, and how to push past them □The #1 benefit of this diet combination that triumphs all the other methods available out there □15 keto-friendly recipes to use as inspiration for future meal planning, as well as to beat food boredom with □The secret to how you can make this plan feel like second nature in your everyday life routine □A fully outlined 30-day meal plan to help you jump-start your diet and get a feel for what foods you should be eating And much more. Even if it seems like you've tried every weight loss plan under the moon with little to no avail, combining intermittent fasting and the keto diet will prove to be effective for you, just like it has many others. If Allie, a woman who had been struggling with her weight since 4th grade, can lose 80 pounds at the age of 30 just from intermittent fasting, consuming keto-approved foods, and maintaining a more

active lifestyle, then so can you. This type of plan isn't like the Atkins diet where you're pressured into buying certain products to boost the company's sales, but rather, you are encouraged to buy real foods that will actually help support and sustain a healthy lifestyle. What's even better: There are no attachments and no monthly membership bills. When it comes to losing weight and keeping it off in the long run, there are no shortcuts. It requires consistency and determination, but that's nothing you can't handle. Give yourself the gift of a lifetime, and begin with a plan that works, because you are worth it. If you want to discover a weight loss plan that will work for you and where you will experience continuous progress, then scroll up and click the "Add to Cart" button right now.

lose 30 pounds in 30 days intermittent fasting: Free The Animal: Lose Weight & Fat With The Paleo Diet Richard Nikoley, 2012-06-12 Drawing on evolutionary logic, scientific research, and his own personal experiences, blogger Richard Nikoley of Free the Animal (freetheanimal.com) presents a complete guide to losing weight and fat the natural way. After many frustrating years of trying to lose weight by adhering to mainstream nutritional guidelines, Richard made a radical decision to throw the rules out. Instead of eating whole grains and lean meat, he ate what his body had always craved: animal fat, and lots of it—and the extra weight started falling away. In *Free The Animal: How To Lose Weight & Fat On The Paleo Diet*, Richard shares his tips for eating, fasting, and exercising as wild humans did for millenia. Find out how to embrace your primal cravings for nutritionally dense animal fats and fiber-rich plant sources. Learn to stop listening to the experts and start tuning in to your body's natural signals. Richard's approach to the Paleo lifestyle will help you lose fat, gain muscle, and unleash the energy of the animal inside you.

lose 30 pounds in 30 days intermittent fasting: Burn the Blubber Robert Dave Johnston, 2014-09-21 In, *Burn the Blubber - How to Lose Belly Fat Fast (And For Good!)*, author Robert Dave Johnston gives you an in-depth look at the causes of belly fat, the health implications and a comprehensive list of tips, techniques and lifestyle changes that can help you get rid of that spare tire once and for all. The author outlines thought, behavior and external changes that helped him overcome 20 + years of obesity and binge eating as well as lose more than 100 pounds, which he has now kept off for 12 years. Topics include, measuring body fat and assessing where you are, creating a definite fat loss goal, getting active, handling emotions and urges to overeat, portion control, dietary changes, list of banned foods, addressing the internal world of thoughts and belief systems, the amazing power of 'daily fasting' and numerous other tips and techniques to promote belly fat loss. Even though losing belly fat can be challenging, the author presents the material in a point-by-point format that is detailed and easy to understand. If you are looking for a guide to help you make the lifestyle changes needed to achieve long-term fat loss, this book will prove itself to be a very useful addition to your library. *Burn the Blubber* is Volume 4 of the series, *How To Lose Weight Fast, Keep it Off & Renew The Mind, Body & Spirit Through Fasting, Smart Eating & Practical Spirituality*. Hello dear friend, this is Rob. Just in case you are still undecided, here are crucial health reasons why you MUST get rid of belly fat quickly and without further hesitation. It may sound cute when somebody tells you that you are shaped like an apple or pear, but what it really means is that you are packing on the visceral fat in the thighs and butt. I get into this topic in detail inside the book; however, there is never anything cute about belly fat in view of the huge health problems that it will ALWAYS cause. Not to alarm you, but too much fat around the mid-section skyrockets your risk of life-threatening health problems as stroke, diabetes and high-blood pressure. But this warning doesn't just apply to those who are heavy. Skinny people can also pack dangerous amounts of unseen blubber. Since the person is not overweight, the fat digs itself deep around the vital organs in your tummy. Sure, these people may look slim on the outside, but, inside, they carry the same health time-bomb as others who may be noticeably overweight or obese. Doctors have told me that accumulations of fat in the midsection actually become ONE 'living organ' inside your body; a derelict 'alien' invader consuming your life resources and 'feeding' on your health. This is quite a dramatic depiction, I know. But I want to drive the message hard and deep that belly fat is deadly and must be destroyed. In which ways is belly fat harming you? Do you know? Are you soberly aware of the seriousness of the situation? Do you realize that immediate

action is required to halt and vanquish these looming sicknesses? IF you are so persuaded, then what are you waiting for? One by one, we will discuss all of the changes that need to happen in your life over time. I will give you plenty of tips, motivation and inspiration to get the ball rolling and never look back. There is still time to sidestep serious health consequences. BUT you must get off the couch, get moving and stop entertaining negative thoughts related to your weight and health. So let's get started! The best is yet to come, IF you train yourself (little by little) to take daily action and modify your lifestyle in the various ways that I will suggest. May peace, love, health and prosperity follow you all of the days of your life!

lose 30 pounds in 30 days intermittent fasting: The Whole30 Melissa Urban, Dallas Hartwig, 2015 Millions of people visit Whole30.com every month and share their stories of weight loss and lifestyle makeovers. Hundreds of thousands of them have read *It Starts With Food*, which explains the science behind the program. At last, The Whole30 provides the step-by-step, recipe-by-recipe guidebook that will allow millions of people to experience the transformation of their entire life in just one month.

lose 30 pounds in 30 days intermittent fasting: Free The Animal: Weight Loss With The Paleo Diet (aka The Caveman Diet) Richard Nikoley, 2012-07-24 Drawing on evolutionary logic, scientific research, and his own personal experiences, blogger Richard Nikoley of Free the Animal (freetheanimal.com) presents a complete guide to losing weight and fat the natural way. After many frustrating years of trying to lose weight by adhering to mainstream nutritional guidelines, Richard made a radical decision to throw the rules out. Instead of eating whole grains and lean meat, he ate what his body had always craved: animal fat, and lots of it—and the extra weight started falling away. In *Free The Animal: How To Lose Weight & Fat On The Paleo Diet*, Richard shares his tips for eating, fasting, and exercising as wild humans did for millenia. Find out how to embrace your primal cravings for nutritionally dense animal fats and fiber-rich plant sources. Learn to stop listening to the “experts” and start tuning in to your body's natural signals. Richard's approach to the Paleo lifestyle will help you lose fat, gain muscle, and unleash the energy of the animal inside you.

lose 30 pounds in 30 days intermittent fasting: The Essential Guide to Intermittent Fasting for Women Megan Ramos, 2023-06-06 From renowned experts Megan Ramos and Dr. Jason Fung: A transformative approach to women's health and well-being that gives readers the tools to reclaim their health sustainably. Essential reading for any woman wanting to improve her metabolic health and make sense of her body, hormones, and sustainable fasting strategies. —Cynthia Thurlow, author of *Intermittent Fasting Transformation* Intermittent fasting has changed my body, mind, and life. I am truly grateful and humbled by humans like Megan who are sharing the truth about health.—Raven-Symoné Struggling with your metabolism and hormone health? Disappointed by diets that don't provide sustainable, long term results? Sick of feeling tired and stressed all the time? Megan Ramos was in the same position when she discovered intermittent fasting at the clinic where she was a researcher. After suffering from non-alcoholic fatty liver disease, PCOS, and type 2 diabetes, she harnessed the power of fasting to reverse these conditions, lose over 80 pounds, and achieve long-lasting health. Today, as the co-founder of The Fasting Method with Dr. Jason Fung, she has helped over 20,000 people, primarily women, improve their wellbeing through intermittent fasting. In *The Essential Guide to Intermittent Fasting for Women*, Ramos shares: Easy-to-use fasting protocols that can be incorporated into your busy schedule Information on when and how to eat to feel full and energized How intermittent fasting can support your health through fertility struggles, PCOS, perimenopause, and menopause How balancing your hormones and stress levels can help you avoid weight gain and depression Designed specifically for women of all ages and their unique needs, this go-to guide provides you with the steps to take control of your health—for good.

lose 30 pounds in 30 days intermittent fasting: *Mental Strategies to Defeat Diet Hunger and Junk Food Cravings* Robert David Johnston, 2023-02-01 * Can you imagine yourself capable of facing hunger and cravings and not give in to them? * Can you imagine yourself sticking to your diet month after month without further delay or interruptions? * Can you imagine the pounds dropping off of your body like never before because you have remained consistent? * Can you imagine yourself

keeping the weight off year after year and never having to struggle with your weight again? How much would all of this be worth to you? The answer is ... LOTS! And helping you to achieve those goals is exactly what this book is all about. Have you tried to lose weight many times and not succeeded? Have you lost weight in the past but regained it in a matter of months? Do you find yourself gung-ho with your diet at one moment, then, just like that, succumb to hunger and or cravings? If so, then you're in the right place. We all know that sticking to a diet long-term can be a challenge. Wanting to eat in-between meals and struggling with the imperious urge for junk food (or any other food not in your diet) are the toughest foes in any weight loss program. Particularly if you are having a bad day or are otherwise physically or emotionally tired, a sudden assault of hunger and cravings could very well cause one to stray. That is why it is important to have mental tools readily-available that can neutralize these mental enemies before they sabotage your progress. I was obese and trapped in binge-eating for nearly 25 years, so I know how demoralizing this can be. The good news is that there is a way out. Not only did I manage to lose 100 pounds, but I have kept the weight off for more than 10 years now. In this book, I share with you the mental techniques that helped me walk through temptation and discomfort WITHOUT breaking my diet and giving up on my weight loss goals. Today, these simple but powerful techniques continue to keep my food-related behaviors in check. For the first time in my life, my weight is stable and I'm no longer yo-yoing as I did for so many years. And what has worked for me and many others can also work for you. If you wish to stick to your diet and lose weight once and for all, I invite you to join me in this journey through weight loss and the mind. By practicing and mastering the techniques presented in this book, you'll find inner strength to hang on until the temptation passes. That, in turn, will place you in a direct path with all of your weight loss and health-improvement goals. The time for your breakthrough has arrived!

lose 30 pounds in 30 days intermittent fasting: Lose the Emotional Baggage Robert Dave Johnston, 2014-09-21 This book is Volume 5 of the series, How To Lose Weight Fast And Renew The Mind, Body & Spirit With Fasting, Smart Eating and Practical Spirituality. We can't deny it; the world is getting crazier and crazier and, as such, our lives are becoming more stressful, full of demands and activities while uncertainty looms in the back of our minds. Am I going to make it? For how much longer can I take this pain? If you have been suffering, be it from depression, the loss of a loved one, a downturn in your economy, or anything else, I am here to tell you that there IS a POWER that can take your whole life in His hands, heal you, restore you, rejuvenate you and fill you with fresh hope and optimism. I don't tell you these things because I saw a movie. I share with you because I myself was in the dark corner of isolation, hopelessness, deep grief, despair. I felt as though I had a knife stuck to my chest all day, every day, from the moment I got up. I'll talk much more about that on my upcoming book on depression. Needless to say, while at times it may look bleak, there IS hope for inner healing and restoration so that you can once again feel the peace and joy that is rightfully yours. If there are wounds in your heart that you've carried for years, the kind of wounds that inflict ongoing emotional pain, I am here to tell you that I love you, I understand you and I am right here with you. Even better, over the years of fasting and spiritual growth me and my mentor John Benitez (may he rest in peace) put together a very powerful program of recovery for those of us who hurt. I'm not going to bombard you with a lot of religion. I will speak to you in spiritual terms that you will understand, without feeling like you are being preached at. (I hate that) Fasting is a powerful way to lose lots of weight quickly and help the body heal and detoxify. In addition, fasting opens the doors to the invisible world of the soul and subconscious mind which, when harnessed correctly, can help you to experience deep emotional healing as well as spiritual revelation and understanding. In *Lose The Emotional Baggage: Transform Your Mind & Spirit With Fasting*, I take you step-by-step through the 'Ultimate Freedom Formula' which helped me to find healing from more than 20 years of crippling depression and binge eating disorder. If you struggle with recurring negative emotions and destructive behaviors and/or addictions, then this book gives you a practical and effective formula that will allow you to tap into the huge invisible power that fasting always provides. The material is presented in a straightforward, non-religious format, so you

will be able to carry out the formula even if you have no spiritual beliefs and are an agnostic. If you can maintain an open mind and become willing to simply observe the possibility that 'maybe' there is something to this fasting practice, then that is more than enough to crack the door open just enough receive tremendous transcendental benefit. Welcome to a place where the impossible becomes possible. May you receive your healing, and may your life be filled with power, joy and a peace beyond understanding.

lose 30 pounds in 30 days intermittent fasting: 5 Ways to Lose Weight Fast Dr. Zulfiqar Ahmed, Tired of carrying around those extra pounds? The best way to lose weight and keep it off is to create a low-calorie eating plan that you can stick to for a long time. If you just want to drop a few pounds fast, there are plenty of techniques and tips you can adopt to help you reach your short-term goals, too. Read to learn more.

lose 30 pounds in 30 days intermittent fasting: The PCOS Plan Nadia Brito Pateguana, Jason Fung, 2020-04-14 New York Times bestselling author Dr. Jason Fung joins forces with naturopathic doctor Nadia Pateguana to offer methods to prevent and reverse PCOS through diet and intermittent fasting. Polycystic Ovary Syndrome (PCOS) is the most common reproductive disorder in the world, affecting an estimated eight to 20 percent of women of reproductive age, almost half of whom are unable to conceive. PCOS is also associated with increased risks of heart disease, ovarian and endometrial cancers, and type 2 diabetes. In this clearly written guide, backed by science and personal experience, Drs. Jason Fung and Nadia Brito Pateguana show: How to prevent and reverse PCOS with a low-carb, ketogenic diet and intermittent fasting. How the root cause of PCOS is excess insulin—and how to get rid of it. 50 recipes and a variety of meal plans for putting new knowledge into (delicious) practice.

lose 30 pounds in 30 days intermittent fasting: Eat Smarter Shawn Stevenson, 2020-12-29 Lose weight, boost your metabolism, and start living a happier life with this transformative 30-day plan for healthy eating from the host of the hit podcast The Model Health Show. Food is complicated. It's a key controller of our state of health or disease. It's a social centerpiece for the most important moments of our lives. It's the building block that creates our brain, enabling us to have thought, feeling, and emotion. It's the very stuff that makes up our bodies and what we see looking back at us in the mirror. Food isn't just food. It's the thing that makes us who we are. So why does figuring out what to eat feel so overwhelming? In Eat Smarter, nutritionist, bestselling author, and #1-ranked podcast host Shawn Stevenson breaks down the science of food with a 30-day program to help you lose weight, reboot your metabolism and hormones, and improve your brain function. Most importantly, he explains how changing what you eat can transform your life by affecting your ability to make money, sleep better, maintain relationships, and be happier. Eat Smarter will empower you and make you feel inspired about your food choices, not just because of the impact they have on your weight, but because the right foods can help make you the best version of yourself.

lose 30 pounds in 30 days intermittent fasting: The Carnivore Diet Alexander Phenix , 2020-05-10 If you've recently come across the concept of the carnivore diet and the idea that you can live on meat, cooked in all manner of creative ways, and lose weight and keep it off, keep reading... You Are About To Discover How Exactly You Can Follow A Carnivore Diet, Live Without Fruits And Vegetables And Effectively Lose Weight, Keep It Off And Enjoy A Wide Array Of Other Benefits! Are you sick and tired of not seeing a shift in the scale no matter what strategy you take up? Have you tried endless other solutions, including taking more fruits and vegetables, but nothing seems to work for more than a few weeks? Do you constantly find yourself taking the blame for your weight loss woes because you are always told how you did not limit your portions (because of a little too much of carbohydrates found in different foods obtained from plants)? Do you finally want to say goodbye to living with the weight-related shame and embarrassments, the fears and the discomfort of living with excess weight and discover something, which works for you? If so, then you've come to the right place. You see, losing weight sustainably, without going through stress or pain doesn't have to be difficult. In fact, it's easier than you think. Studies in the National Institutes of Health

suggest that adopting the carnivore diet is the way to go in weight loss, as a carnivore diet is rich in satiating foods and extremely low in carbs (if any). Other reports in Science Direct assert that the carnivore diet is the best diet to slow down weight gain, and increase fat burning for healthy people and those suffering from chronic illnesses. That means that if you really are keen on shedding those pounds with a scientifically proven method, then you should look no further. But even so, I know you might be asking yourself: But isn't meat unhealthy – hasn't it been linked with cardiovascular diseases, high cholesterol and many others? Aren't fruits and vegetables the healthiest food options you should be taking? Is the carnivore diet all about taking meat? How is the typical breakfast, lunch and dinner like while on a carnivore diet? How do you deal with any challenges you may face? If you have these and other related questions, this book is for you so keep reading... It will teach you: -The basics of the carnivore diet, including what it is, what it entails, comparison with other diets, myths about it and more -Pros and cons of adopting a carnivore diet -How to adapt to the carnivore diet, including how to tell if it is for you, what to eat and what to avoid -Powerful tips that will propel you to success -The nutritional value in different foods allowed in the carnivore diet -Delicious recipes that you can prepare for breakfast, lunch and dinner while on the carnivore diet -Answers to some of the frequently asked questions about the carnivore diet -The lifestyle options with the carnivore diet ...And so much more! Even if you feel inadequate to live without fruits and vegetables and have concerns about not taking enough veggies and other nutrients found in fruits and vegetables, this book will show you exactly what you need to do, when and for how long to see those pounds coming off, fast! Click Buy Now With 1-Click or Buy Now to get started!
