part time online jobs philippines home based: *Redefining Multicultural Families in South Korea* Minjeong Kim, Hyeyoung Woo, 2022-06-17 *Redefining Multicultural Families in South Korea* provides an in-depth look at the lives of families in Korea that include immigrants. Ten original chapters in this volume, written by scholars in multiple social science disciplines and covering different methodological approaches, aim to reinvigorate contemporary discussions about these multicultural families. Specially, the volume expands the scope of "multicultural families" by examining the diverse configurations of families with immigrants who crossed the Korean border during and after the 1990s, such as the families of undocumented migrant workers, divorced marriage immigrants, and the families of Korean women with Muslim immigrant husbands. Second, instead of looking at immigrants as newcomers, the volume takes a discursive turn, viewing them as settlers or first-generation immigrants in Korea whose post-migration lives have evolved and whose membership in Korean society has matured, by examining immigrants' identities, need for political representation, their fights through the court system, and the aspirations of second-generation immigrants.

part time online jobs philippines home based: Assessing University Governance and Policies in Relation to the COVID-19 Pandemic Alaali, Mansoor A., 2021-09-10 In response to the COVID-19 pandemic, universities around the globe have taken numerous extraordinary measures and implemented many changes to their strategic, operational, and academic activities. Currently, there is a transformation taking place from the emergency decision-making in the early stages of the pandemic towards reflection and resolution on how the past months can shape governance and strategy. Higher education institutions have been facing challenges with the alignment of their university governance for their strategic and operational plans. Presently, university leaders have prioritized risk management and financial management over all else. Unfortunately, due to these priorities, university responses to the pandemic took the top-down approach of management, rejecting the shared governance structures and collegial practices of the institutions. The pandemic has accelerated the openness to change by creating an emergency or steering response team led by university presidents and provosts, with sub-teams focusing on operations and other academic advisory groups working together to deal with the fast-rising scenarios. The consequence is a clear flow of information and strong communication across the institution, which sequentially builds on mechanisms to respond to the secondary effects of the pandemic. Moreover, higher education institutions are continuously facing challenges with their strategic alignment of business objectives in order to have a diverse educational system in response to the pandemic. Assessing University Governance and Policies in Relation to the COVID-19 Pandemic presents the latest research and studies investigating information on university governance and adapting previous, existing, and proposed models for the current pandemic. This

book is comprised of chapters contributed by various leading international authors to discuss and analyze all aspects of university governance in relation to their impact on strategies in finance, sustainability, academic issues, research, faculty and students, leadership, campus, employment and recruitments, and more. This is an essential text for university presidents, strategic planning authorities in universities, college deans and academic department chairpersons, government authorities and policymakers, researchers, students, and academicians.

Olson, 2010-08-16 This book provides research assistance for 99 current and provocative issues students can use to write a brief argumentative paper. In 2030, it is projected that 65 percent of the population will be over 65. The U.S. Government Census Bureau reveals that over an adult's working life, college graduates typically earn close to \$1 million more than high school graduates. About 43 percent of American families spend more than they earn each year. These three factoids represent a tiny fraction of the potential research subjects contained in 99 Jumpstarts to Research: Topic Guides for Finding Information on Current Issues, Second Edition, a completely revised follow-up to the original edition. Every jumpstart—each focused upon a current, timely issue—contains ideas for narrowing the topic, research keywords, suggested best books and databases, and Internet sites. This book supports both faculty and students in identifying compelling topics, effectively evaluating and selecting resources in today's information-overload world, and deriving enjoyment from the research and writing process.

part time online jobs philippines home based: Inclusion and Exclusion in Europe Olena Fedyuk, Paul Stewart, 2018-03-02 Recent decades have seen the EU grappling with a major struggle between the securitization of its external borders and demand for exploitable and disposable cheap workforce in various sectors. As a result, the EU has multiplied its borders by pushing them both outwards and inwards, and the distinction between migrants' status as regular and irregular, legal and illegal, citizen and non-citizen, has been continuously portrayed as black and white. This produces and sustains an analytical, political and practical divide that often obscures commonalities in workers' dispossession and is an obstacle to unified struggles to secure workers' rights. This volume moves beyond a perspective of migrants' exclusion and inclusion as solely a product of migration processes. It contextualizes migration in the larger transformations of the local, national and transnational labour markets and relations that point to the ongoing precarization of working lives. These processes of inclusion are methodologically approached through exclusion at macro, micro and meso levels. This positions the ethnographically documented experiences of immigrant labourers in the challenges of contemporary labour and migratory regimes, and traces new forms of collective response and contestation emerging in these reconfiguring contexts.

Drolet, 2016-10-31 This book examines immigration to small cities throughout Canada. It explores the distinct challenges brought about by the influx of people to urban communities which typically have less than 100,000 residents. The essays are organized into four main sections: partnerships, resources, and capacities; identities, belonging, and social networks; health, politics, and diversity, and Francophone minority communities. Taken together, they provide a comprehensive, multi-disciplinary perspective on the contemporary realities of immigration to small urban locations. Readers will discover how different groups of migrants, immigrants, and Francophone minorities confront systemic discrimination; how settlement agencies and organizations develop unique strategies for negotiating limited resources and embracing opportunities brought about by changing demographics; and how small cities work hard to develop inclusive communities and respond to social exclusions. In addition, each essay includes a case study that highlights the topic under discussion in a particular city or region, from Brandon, Manitoba to the Thompson-Nicola Region in British Columbia, from Peterborough, Ontario to the Niagara Region. As a complement to metropolitan-based works on immigration in Canada, this collection offers an important dimension in migration studies that will be of interest to academics, researchers, as well as policymakers and practitioners working on immigrant integration and settlement.
