

mobile pos systems for craft fairs

The buzz of a craft fair is electric, filled with unique creations and passionate artisans. To truly capitalize on this energy and streamline your sales process, having the right tools is paramount. This is where **mobile pos systems for craft fairs** become indispensable. These innovative solutions empower creators to accept payments, manage inventory, and engage with customers seamlessly, transforming a potentially chaotic transaction into a smooth, professional experience. This comprehensive guide will delve into what makes a mobile POS system ideal for craft fair vendors, explore essential features, discuss hardware considerations, and offer insights into choosing the perfect solution to elevate your craft fair business. We will cover everything from basic payment processing to advanced inventory tracking and customer relationship management, ensuring you are equipped with the knowledge to make informed decisions.

The Future of Mobile POS in the Crafting World

Understanding Mobile POS Systems for Craft Fairs

A mobile POS system is essentially a point-of-sale solution that operates on a portable device, such as a smartphone or tablet, often paired with a card reader. For craft fair vendors, this mobility is the defining advantage. Gone are the days of relying solely on cash or clunky, tethered terminals. Mobile POS systems bring the checkout experience directly to your booth, allowing for immediate transactions wherever your customers are browsing. This flexibility is crucial in the dynamic environment of a craft fair, where setting up a permanent sales counter is impractical.

The core function of these systems is to process various payment types. This includes credit cards, debit cards, and increasingly, contactless payments like Apple Pay and Google Pay. This broad acceptance of payment methods is vital for maximizing sales, as customers today expect convenience and a variety of options. Beyond payments, a robust mobile POS can also track sales in real-time, provide basic inventory management, and even store customer information, offering a centralized hub for your craft business operations right from your stall.

Key Features of a Mobile POS System for Craft Fairs

When selecting a mobile POS system specifically for the demands of craft fairs, certain features rise to the top in terms of importance and utility. These functionalities are designed to enhance efficiency, improve customer experience, and provide valuable business insights.

Seamless Payment Processing

The absolute bedrock of any POS system is its ability to accept payments quickly and securely. For craft fairs, this means supporting a wide array of payment types. This includes chip cards (EMV), magnetic stripe cards, and the ever-growing popularity of contactless payments and mobile wallets. A reliable card reader that connects effortlessly to your device, whether via Bluetooth or directly plugged in, is essential for minimizing transaction times and avoiding customer frustration. Look for systems that offer clear transaction fees so you can accurately calculate your profit margins.

Inventory Management Capabilities

Managing inventory at a busy craft fair can be a daunting task. A good mobile POS system offers features to track stock levels, categorize products, and even alert you when items are running low. This can be as simple as manually inputting product details and quantities or as advanced as setting up SKUs for each item. Real-time inventory updates are invaluable, preventing overselling and helping you understand which of your creations are most popular. This data can inform your production decisions for future fairs.

Sales Reporting and Analytics

Understanding your sales performance is key to growth. Mobile POS systems provide valuable insights through detailed sales reports. These reports can break down sales by product, by day, or by payment type. For craft fair vendors, this means knowing which items are flying off the shelves and which might need a marketing boost. Analyzing these trends helps you optimize your product mix, pricing strategies, and even your booth layout for future events. The ability to access this data on the go makes it easy to review performance during the fair itself.

Customer Relationship Management (CRM) Features

Building relationships with your customers can lead to repeat business and loyal patrons. Some mobile POS systems include basic CRM functionalities, allowing you to collect customer contact information (with their consent, of course) and track past purchases. This data can be used to send out follow-up emails, announce new product lines, or invite them to your next event. For artisans, fostering this connection is just as

important as the transaction itself.

Offline Mode Functionality

While many craft fair venues offer Wi-Fi, it's not always reliable. A critical feature for mobile POS systems at events is offline mode. This allows you to continue processing transactions even if your internet connection drops. The system will securely store the transaction data and sync it once a connection is re-established. This prevents lost sales and ensures that you can operate smoothly regardless of connectivity issues, a common challenge at outdoor or less developed event locations.

Ease of Use and Setup

Given the often hectic nature of setting up and operating a booth at a craft fair, the mobile POS system needs to be intuitive and easy to learn. A complex setup or confusing interface can lead to errors and delays. Look for systems with user-friendly dashboards, clear navigation, and straightforward payment processing flows. Many systems offer free trials, allowing you to test their usability before committing.

Hardware Essentials for Craft Fair POS

Beyond the software, the physical components of your mobile POS system are crucial for efficient operation at a craft fair. The right hardware ensures reliability, portability, and a professional presentation.

Mobile Device

The core of your mobile POS is the device itself. This is typically a smartphone or a tablet, running either iOS or Android. The choice between the two often depends on your existing ecosystem and personal preference. Larger screens on tablets can offer a more comfortable user experience for browsing products and managing sales, especially for vendors with extensive product lines. Ensure your device has sufficient battery life or that you have a reliable portable power bank.

Card Reader

The card reader is your gateway to accepting non-cash payments. These come in various forms, from small, portable dongles that plug into your device's audio jack or charging port to sleek, wireless Bluetooth devices. For craft fairs, portability and speed are key. Look for readers that support EMV chip cards, magnetic stripes, and contactless payments. Many modern readers offer all three capabilities in a single, compact unit.

Printer (Optional but Recommended)

While not strictly mandatory for all mobile POS systems, a portable receipt printer can significantly enhance your professional image and customer satisfaction. Many vendors choose to offer receipts, and having a compact, Bluetooth-enabled printer makes this a breeze. This is especially useful for higher-value items or for customers who request a physical record of their purchase. Ensure the printer uses readily available receipt paper rolls.

Payment Terminal Stand or Holder

To create a more organized and professional checkout area, consider a stand or holder for your tablet or smartphone. This elevates your device, making it easier for both you and your customers to view the transaction details. It also helps to protect your device from accidental drops or spills, which can happen in busy environments. Some stands even offer integrated storage for accessories or a built-in battery pack.

Portable Power Source

Long days at a craft fair can drain your device batteries quickly. A reliable portable power bank or a car inverter (if you have vehicle access) is an absolute necessity. Being able to charge your devices throughout the day ensures that your sales process remains uninterrupted. Invest in a power bank with sufficient capacity to fully recharge your devices multiple times.

Choosing the Right Mobile POS for Your Craft Business

Selecting the optimal mobile POS system involves careful consideration of your specific business needs, budget, and the types of craft fairs you typically attend. There isn't a one-size-fits-all solution, so a personalized approach is essential.

Assess Your Sales Volume and Product Complexity

If you sell a high volume of low-cost items, speed and ease of transaction are paramount. For vendors with more complex or customizable products, features like detailed product descriptions and modifiers become more important. Understanding your typical transaction value will also influence the types of security features you prioritize.

Evaluate Transaction Fees and Costs

Mobile POS systems typically operate on a tiered fee structure, with costs based on transaction volume and processing fees. Compare the per-transaction fees, monthly software subscription costs, and any hardware purchase prices. Some systems offer flat-rate pricing, while others have variable rates. It's crucial to factor these costs into your overall pricing strategy to ensure profitability.

Consider Your Technical Proficiency

If you're not particularly tech-savvy, opt for a system with a simple, intuitive interface and readily available customer support. Many providers offer extensive online tutorials, knowledge bases, and responsive customer service channels, which can be invaluable for troubleshooting and getting the most out of your system.

Read Reviews and Seek Recommendations

Before making a decision, invest time in reading reviews from other craft fair vendors or small business owners who use mobile POS systems. Online forums, industry blogs, and app store reviews can provide honest feedback on system reliability, customer support, and overall user experience. Recommendations from fellow artisans can be particularly insightful.

Test Drive with Free Trials

Many reputable mobile POS providers offer free trials of their software. This is an excellent opportunity to test the system's features, usability, and compatibility with your chosen hardware. Use the trial period to simulate real-world scenarios, such as processing different types of payments and managing your inventory. This hands-on experience is invaluable in making an informed choice.

Maximizing Your Mobile POS Investment at Craft Fairs

Once you've selected and implemented your mobile POS system, the next step is to leverage its capabilities to their fullest potential at each craft fair. Strategic use can significantly boost your sales and streamline your operations.

Create a Dedicated Checkout Station

Even in a bustling fair, having a designated area for transactions helps maintain order and professionalism.

Ensure your mobile POS setup is easily accessible to customers and that you have enough space to manage your device, card reader, and any associated accessories without clutter. A tidy setup reflects positively on your brand.

Offer Multiple Payment Options

Make it as easy as possible for customers to pay. Promote the fact that you accept credit cards, debit cards, and mobile wallets. This removes a potential barrier to purchase and caters to the diverse payment preferences of fair attendees. Clearly display accepted payment methods at your booth.

Utilize Inventory Tracking for Smart Restocking

During the fair, constantly monitor your inventory levels through your POS system. This allows you to see which items are selling out quickly. You can then either replenish stock from your vehicle (if feasible) or make a note to prioritize those popular items for your next production cycle. This proactive approach ensures you don't miss out on sales due to stockouts.

Collect Customer Information (with consent)

For returning customers or those interested in your work, politely ask if they'd like to join your email list for updates on future events or new creations. This can be easily managed through your POS's CRM features. Building an email list is a powerful tool for direct marketing and fostering a loyal customer base, turning one-time buyers into repeat patrons.

Train Your Staff (if applicable)

If you have assistants or family members helping at your booth, ensure they are adequately trained on how to use the mobile POS system. A well-trained team can handle transactions efficiently, allowing you to focus on engaging with customers and showcasing your products. Clear instructions and practice runs are essential.

The Future of Mobile POS in the Crafting World

The evolution of mobile POS technology continues to accelerate, promising even more innovative solutions for craft fair vendors. As technology advances, we can expect to see further integration of features that enhance the artisan's experience and customer engagement. This ongoing development ensures that mobile POS systems will remain at the forefront of sales technology for the creative community.

Emerging trends include more sophisticated inventory management that might integrate with manufacturing processes or provide predictive analytics on product demand. We may also see enhanced loyalty program capabilities directly within the POS, allowing artisans to easily reward repeat customers. Furthermore, the integration with e-commerce platforms will likely become even more seamless, enabling a unified approach to sales across both physical and online channels. The focus will remain on providing powerful, yet accessible, tools that empower creators to thrive in an increasingly digital marketplace.

The adaptability of mobile POS systems means they will continue to evolve alongside the craft industry. As new payment methods emerge and customer expectations shift, these systems will adapt, providing artisans with the cutting-edge tools necessary to compete and succeed. Embracing these technologies is no longer just an option; it's a strategic imperative for any craft fair vendor looking to maximize their sales potential and build a sustainable business.

The integration of artificial intelligence and machine learning could also play a significant role, offering personalized recommendations to customers at the point of sale or optimizing pricing strategies in real-time based on demand and inventory. These advanced capabilities, once reserved for large retailers, are gradually becoming accessible to small businesses, democratizing powerful sales tools for artisans.

Ultimately, the future of mobile POS for craft fairs points towards greater efficiency, deeper customer insights, and a more integrated sales experience. By staying informed about technological advancements and choosing systems that align with their growth objectives, craft fair vendors can harness the power of mobile POS to transform their passion into a thriving enterprise.

The continued development of user-friendly interfaces and cloud-based solutions ensures that even those with limited technical expertise can benefit from these advanced tools. This accessibility is key to empowering a wider range of artisans and fostering a more dynamic and innovative craft market. The journey of mobile POS in the crafting world is one of continuous improvement and exciting potential.

FAQ

Q: What is the primary benefit of using a mobile POS system for craft fairs?

A: The primary benefit is the unparalleled mobility and flexibility it offers. It allows you to accept payments anywhere within your booth, process transactions quickly, and manage your sales operations efficiently without being tied to a fixed location or a bulky cash register.

Q: Can I accept credit cards with a mobile POS system at a craft fair?

A: Yes, absolutely. Mobile POS systems are designed to securely accept all major credit and debit cards, including chip cards (EMV) and magnetic stripe cards. Most also support contactless payments like Apple Pay and Google Pay.

Q: How does inventory management work with a mobile POS system for craft fairs?

A: Many mobile POS systems allow you to create a digital inventory of your products. You can input product names, descriptions, prices, and quantities. Each time an item is sold, the system automatically deducts it from your stock, providing real-time inventory counts.

Q: What happens if the Wi-Fi or cellular signal is weak at the craft fair venue?

A: Most reliable mobile POS systems offer an offline mode. This feature allows you to continue processing transactions even without an internet connection. The sales data is stored securely on your device and will sync with the system once a connection is re-established.

Q: Are mobile POS systems expensive for craft fair vendors?

A: The cost varies greatly. Many providers offer affordable solutions with low monthly fees and per-transaction processing charges, making them accessible for small businesses and individual artisans. You can often find systems that include a free card reader or offer it at a low cost.

Q: Can a mobile POS system help me track my sales performance at craft fairs?

A: Yes, this is a significant advantage. Mobile POS systems provide detailed sales reports and analytics, allowing you to see which products are selling best, track revenue over time, and understand your peak sales periods. This data is invaluable for making informed business decisions.

Q: What kind of hardware do I need for a mobile POS system at a craft fair?

A: You will need a smartphone or tablet, a compatible card reader (which often connects via Bluetooth or your device's charging port), and optionally, a portable receipt printer. Ensuring you have a reliable

portable power source is also crucial.

Q: How does a mobile POS system help improve customer experience at a craft fair?

A: By enabling faster transaction times, offering convenient payment options (including contactless), and providing digital receipts, mobile POS systems create a smoother and more professional checkout experience for your customers.

mobile pos systems for craft fairs: *Farmers Market Strategies* Amelia Green, AI, 2025-02-27 Farmers Market Strategies offers a comprehensive guide for farmers aiming to thrive through direct-to-consumer sales. It emphasizes that success in farmers markets hinges on more than just quality products; it requires a strategic approach encompassing meticulous planning, effective marketing, and efficient operations. The book highlights the growing consumer interest in local food systems, noting that direct sales allow farmers to capture a larger share of revenue and build vital customer relationships. It also stresses the importance of diversifying income streams in today's competitive agricultural market. The book progresses logically, beginning with market selection and preparation, including vendor applications and legal considerations, then moves to strategies for attracting and retaining customers through product presentation and booth design. Finally, it explores operational aspects like inventory management and point-of-sale systems. Supported by case studies and analysis of consumer trends, this resource connects small business management, marketing, and agricultural economics, offering a practical, step-by-step approach with real-world examples for immediate implementation.

mobile pos systems for craft fairs: *App Development Recipes for iOS and watchOS* Molly K. Maskrey, 2016-06-17 App Development Recipes for iOS and watchOS explores the technical side of app development with tips and tricks to avoid those little things that become big frustrations, outside of the realm of development, causing many people to throw up their hands and say "It's just not worth the hassle!" The experiential nature of this work sets it apart from other iOS and watchOS books. Even if you are a developer who is completely new to Swift, iOS or watchOS, you'll find the right experienced-based answers to important questions like "Why do I need version control?", "Why is testing so important?" and more specific problems directly related to iOS and watchOS development with Swift. We discover and summarize the most common problems and derive the solutions; not just a short answer and screenshot, but a systematic, logical derivation, that is, how we got to the solution. /div After the introductory basics, each chapter delivers a problem statement and a solution. The experienced developer may, without losing anything, skip to whatever problem with which they are currently dealing. At the same time, we guide the less experienced developer through the process with focus on solving problems along the way. What you will learn: iOS career

options for the new developer Working with Source Code and Version Control How to work with iOS accessory devices Understanding development methodologies such as Agile/Scrum User Experience Development and UI Tools Unit, UI, and Beta Testing Publishing your work Who this book is for:/divDevelopers who need to find specific solutions to common problems in developing apps for iOS and watchOS.

mobile pos systems for craft fairs: Promoting and Marketing Events Nigel Jackson, 2013-10-28 This accessible book introduces students to the theories, concepts and skills required to promote an event successfully. To promote an event effectively it is essential to understand marketing, but it is also important to recognise that it is not just consumers who are the audience: other publics who may not necessarily attend can have a fundamental effect on the success of an event as well. Uniquely therefore, this book covers two related themes: marketing and public relations in an events context. This will offer events planners a comprehensive guide on how to promote events to a range of audiences, and on how to use this to manage an event's long-term reputation. The book focuses on core marketing and PR current theory specifically relevant to the events industry and introduces topics such as marketing strategy, the consumer, marketing PR and how to use the internet to promote events. It integrates a range of international case studies from small-scale events to mega-events to help show how theory can be applied in practice. It further includes inserts of interviews with practitioners in the field, to offer insight into the realities of event communication and to show how to overcome potential pitfalls. Learning outcomes, discussion questions and further reading suggestions are included to aid navigation throughout the book, spur critical thinking and further students' knowledge. The book is essential reading for all students studying Events Management, and provides valuable reading for students, academics and practitioners interested in marketing and public relations in general.

mobile pos systems for craft fairs: Cyber Security & Digital Awareness Shruti Dalela, Mrs. Preeti Dalela, 2023-10-25 Cybersecurity and Digital Awareness for Students is an essential book designed for students pursuing various academic disciplines, such as BCA, BA, BCom, BTech, BHSc, and anyone looking to enhance their general awareness in the digital realm. This book combines comprehensive knowledge with a unique feature – multiple-choice questions (MCQs) to help students reinforce their learning. Key aspects of the book include: Cyber Threat Landscape: The book provides a clear understanding of the ever-evolving cyber threats, from malware and hacking to data breaches, making it relevant to students from diverse fields. Digital Literacy: Emphasizing the significance of digital literacy, it equips students with the knowledge needed to navigate and thrive in the digital world effectively. Data Protection and Privacy: In an era of data breaches and privacy concerns, the book educates students on safeguarding their personal information online and understanding relevant laws and regulations. Online Etiquette and Behavior: It delves into appropriate online conduct and addresses topics like cyberbullying and harassment, which are relevant to students in their personal and professional lives. Security Awareness and Education: The book encourages lifelong learning about emerging cyber threats and best practices for online safety, and it includes MCQs to reinforce this knowledge. Cybersecurity as a Career: It introduces the exciting field of cybersecurity as a potential career path, shedding light on various roles and the growing demand for cybersecurity professionals. Emerging Technologies: The book explores how cutting-edge technologies like artificial intelligence and the Internet of Things (IoT) are shaping the digital landscape and the importance of understanding their security implications. Global Perspectives: With a global outlook on cybersecurity, it highlights the international nature of cyber threats and the need to stay informed about worldwide trends. The MCQs interspersed throughout the book offer students the opportunity to test their comprehension and problem-solving skills. This book is a valuable resource for enhancing general awareness, preparing for future careers, and reinforcing knowledge about cybersecurity and digital awareness. It equips students to navigate the digital world confidently and responsibly, making it an invaluable addition to their educational journey.

mobile pos systems for craft fairs: Fusing Art and Technology: Co-Creating Futures for New Generations Anh, Trinh Thuy, 2025-08-29 Immersive technologies, including virtual reality (VR) and augmented reality (AR), are revolutionizing human-computer interactions. Due to these technological advancements, there are increased opportunities and an increased interest in artistic experimentation. There is also an increasing concern about the direction that human intelligence is taking. At the same time, TechArt can address educational challenges, transform traditional systems, and ensure equity. As such, art and technology can co-create sustainable futures for the new generation. *Fusing Art and Technology: Co-Creating Futures for New Generations* aims to bridge the existing gap in resources that critically examine the fusion of art and technology. By focusing on the creative, sustainable, and culturally enriching advances in the ArtTech field, it illuminates paths for future collaboration and innovation, addressing the challenges and opportunities at the intersection of these disciplines. Covering topics such as aesthetic value, human intelligence, and social development, this book is an excellent resource for artists, technologists, cultural institution professionals, policymakers, researchers, professionals, scholars, academicians, and more.

mobile pos systems for craft fairs: Explorations in Art and Technology Linda Candy, Ernest Edmonds, Fabrizio Poltronieri, 2018-10-04 *Explorations in Art and Technology* presents the explorations in Art and Technology of the Creativity & Cognition Research Studios. The Studios were created to bring together the visions and expertise of people working at the boundaries of art and digital media. The book explores the nature of intersection and correspondence across these disciplinary boundaries, practices and conceptual frameworks through artists' illustrated contributions and studies of work in progress. These experiences are placed within the context of recent digital art history and the innovations of early pioneers.

mobile pos systems for craft fairs: Mobile Jennifer Siegal, 2002 This text explores the ever-growing range of possibilities of portable, demountable, and mobile structures. The volume includes work by Office of Mobile Design, LOT/EK and Mark Fisher. Using colour images, text and detailed drawings, the contributors reveal their working methods.

mobile pos systems for craft fairs: Developing the Framework for Safe and Efficient Mobile Payments United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 2013

mobile pos systems for craft fairs: *Innovation and the Arts* Piero Formica, John Edmondson, 2020-02-19 By dwelling on the need for the convergence of business, innovation and the arts, this book highlights the value of lowering the psychological, organizational and institutional barriers that keep them apart. For educators and practitioners, this is an in-depth discussion designed to stimulate awareness of the issues facing business education.

mobile pos systems for craft fairs: *Who's Who in American Art, 1991-1992* Bowker Editorial Staff, R R Bowker Publishing, 1990

mobile pos systems for craft fairs: *Spoken Multimodal Human-Computer Dialogue in Mobile Environments* Wolfgang Minker, Dirk Bühler, Laila Dybkjær, 2005-08-17 This book is

based on publications from the ISCA Tutorial and Research Workshop on Multi-Modal Dialogue in Mobile Environments held at Kloster Irsee, Germany, in 2002. The workshop covered various aspects of development and evaluation of spoken multimodal dialogue systems and components with particular emphasis on mobile environments, and discussed the state-of-the-art within this area. On the development side the major aspects addressed include speech recognition, dialogue management, multimodal output generation, system architectures, full applications, and user interface issues. On the evaluation side primarily usability evaluation was addressed. A number of high quality papers from the workshop were selected to form the basis of this book. The volume is divided into three major parts which group together the overall aspects covered by the workshop. The selected papers have all been extended, reviewed and improved after the workshop to form the backbone of the book. In addition, we have supplemented each of the three parts by an invited contribution intended to serve as an overview chapter.

mobile pos systems for craft fairs: Soft City Culture and Technology Carl Skelton, 2013-09-20 *Soft City Culture and Technology: The Betaville Project* discusses the complete cycle of conception, development, and deployment of the Betaville platform. Betaville is a massively participatory online environment for distributed 3D design and development of proposals for changes to the built environment— an experimental integration of art, design, and software development for the public realm. Through a detailed account of Betaville from a Big Crazy Idea to a working deep social medium, the author examines the current conditions of performance and accessibility of hardware, software, networks, and skills that can be brought together into a new form of open public design and deliberation space, for and spanning and integrating the disparate spheres of art, architecture, social media, and engineering. Betaville is an ambitious enterprise, of building compelling and constructive working relationships in situations where roles and disciplinary boundaries must be as agile as the development process of the software itself. Through a considered account and analysis of the interdependencies between Betaville's project design, development methods, and deployment, the reader can gain a deeper understanding of the potential socio-technical forms of New Soft Cities: blended virtual-physical worlds, whose public works must ultimately serve and succeed as massively collaborative works of art and infrastructure.

mobile pos systems for craft fairs: The Work of Art in a Digital Age: Art, Technology and Globalisation Melissa Langdon, 2014-08-20 This book explores digital artists' articulations of globalization. Digital artworks from around the world are examined in terms of how they both express and simulate globalization's impacts through immersive, participatory and interactive technologies. The author highlights some of the problems with macro and categorical approaches to the study of globalization and presents new ways of seeing the phenomenon as a series of processes and flows that are individually experienced and expressed. Instead of providing a macro analysis of large-scale political and economic processes, the book offers imaginative new ways of knowing and understanding globalization as a series of micro affects. Digital art is explored in terms of how it re-centers articulations of globalization around individual experiences and offers new ways of accessing a complex topic often expressed in general and intangible terms. *The Work of Art in a Digital Age: Art, Technology and Globalization* is analytic and accessible, with material that is of interest to a range of researchers from different disciplines. Students studying digital art, film, globalization, cultural studies or digital media trends will also find the content fascinating.

mobile pos systems for craft fairs: ,

mobile pos systems for craft fairs: 2000 and Beyond Valerio Terraroli, 2010 The fifth book in the series, this volume concludes this extraordinary publishing project by analyzing the fascinating and controversial phenomena of contemporary art. Volume V maintains the structure that characterizes the four previous publications, namely a spectacular gallery of images, essays by major contemporary critics and the clever juxtaposition of the most diverse objects and topics. In contrast, it abandons the historical and thematic reconstructions and reference to the most familiar names and scientific categories, to which contemporary events, by their very nature, cannot be subject. And it chooses to describe the multi-faceted tendencies of the contemporary age as

day-to-day events, which as such directly concern readers.

mobile pos systems for craft fairs: Commerce Today , 1975

mobile pos systems for craft fairs: Who's Who in American Art Marquis Who's Who, 2006-11

mobile pos systems for craft fairs: Business America , 1993 Includes articles on international business opportunities.
