

track elderly parents location

The Essential Guide to Tracking Elderly Parents' Location

track elderly parents location is a topic that weighs on the minds of many adult children, driven by a deep-seated desire to ensure their loved ones' safety and well-being. As parents age, they may face challenges with memory, mobility, or chronic health conditions that can increase their vulnerability. Understanding the available methods for discreetly and effectively tracking their location offers peace of mind and empowers caregivers to provide timely assistance when needed. This comprehensive guide explores the various technological solutions, legal and ethical considerations, and practical approaches to keeping tabs on elderly parents without compromising their dignity or independence. We will delve into GPS tracking devices, smartphone applications, medical alert systems with location services, and even less technological solutions, discussing their pros and cons.

Understanding the Need to Track Elderly Parents' Location

The decision to track an elderly parent's location is rarely made lightly. It stems from genuine concern for their safety, particularly when they live independently or have conditions that might put them at risk. Wandering, disorientation due to cognitive decline, or simply the possibility of a fall or medical emergency can be significant worries for family members. The ability to know a parent's whereabouts can be crucial in averting dangerous situations, such as a senior getting lost while driving, forgetting to take medication, or venturing out without proper attire in inclement weather. This proactive approach allows for swift intervention and can significantly reduce the anxiety associated with their independence.

The necessity for such measures often becomes apparent after an incident, or as a preventative step before potential issues arise. Many seniors wish to maintain their autonomy, and technology offers a way to support this desire while providing a safety net. The goal is to implement tracking solutions that are as unobtrusive as possible, respecting their privacy while ensuring their security. This balance is key to maintaining a healthy relationship and fostering trust.

Technological Solutions for Tracking

Modern technology offers a sophisticated array of tools to help adult children keep track of their elderly parents' locations. These solutions range from dedicated tracking devices to features integrated into

everyday technology.

GPS Tracking Devices

Dedicated GPS tracking devices are often small, discreet, and can be worn by the individual or placed in their belongings. These devices utilize satellite technology to pinpoint a person's exact location, which can then be viewed on a smartphone app or web portal. Many devices offer features like geofencing, which alerts caregivers if the wearer enters or leaves a predetermined safe zone, and an SOS button for emergencies. The battery life of these devices can vary, and some require a monthly subscription service.

Smartphone Applications

For parents who are comfortable using smartphones, various applications can enable location sharing. These apps, such as Google's Find My Device or Apple's Find My app, allow users to share their real-time location with designated contacts. Some family safety apps also offer more advanced features like location history, route tracking, and in-app messaging. It's essential to ensure the parent understands and consents to this location sharing and that the app is set up to run in the background without draining excessive battery.

Medical Alert Systems with Location Services

Many modern medical alert systems go beyond simply providing a button to press in an emergency. Newer models often incorporate GPS technology, allowing the device to transmit the wearer's location to a monitoring center if an alert is triggered. This is particularly beneficial for seniors who may be prone to falls or other medical emergencies while away from home, such as during walks or errands. The monitoring center can then dispatch help to the precise location, ensuring a faster response time.

Smartwatches with GPS Capabilities

Smartwatches designed for seniors often come equipped with GPS tracking. These devices can provide location data to caregivers and usually include an SOS button that, when pressed, sends an alert with the wearer's location to pre-set contacts or a monitoring service. Some smartwatches also offer fall detection, which automatically triggers an alert if a hard fall is detected. The convenience of a smartwatch means the tracking functionality is integrated into a device many seniors might already wear or find useful.

Non-Technological Methods for Location Awareness

While technology offers powerful tracking capabilities, it's not the only solution, and sometimes, simpler methods are more appropriate or effective.

Regular Communication and Check-ins

Consistent communication is fundamental. Establishing a routine for daily or frequent phone calls, video chats, or text messages can provide a sense of connection and an opportunity to gauge a parent's well-being and current activities. If a scheduled call is missed, it can serve as an immediate indicator that something might be amiss, prompting a follow-up. This method respects independence while ensuring a basic level of oversight.

Community and Social Support Networks

Engaging elderly parents in community activities and fostering strong social connections can indirectly contribute to their safety and location awareness. Neighbors, friends, and members of religious or social groups can act as informal watchdogs. If a parent deviates from their usual routine or seems disoriented, these individuals can often be the first to notice and offer assistance or alert family members. Building these support networks is a holistic approach to elder care.

Legal and Ethical Considerations

When implementing any tracking solution for elderly parents, it is paramount to navigate the legal and ethical landscape with care and respect.

Consent and Privacy

The most critical aspect is obtaining informed consent from the elderly parent. Tracking someone without their knowledge or against their wishes raises significant privacy concerns and can damage trust. It's important to have an open and honest conversation about why tracking is being considered, what information will be collected, and how it will be used. If a parent has diminished capacity, the decision may fall to a legal guardian, but the principle of acting in their best interest and with as much respect for their autonomy as possible remains.

Legal Ramifications

Understanding the legal implications of tracking is also important. In most jurisdictions, tracking individuals without their consent can have legal repercussions, especially if done for purposes of harassment or unauthorized surveillance. However, when undertaken with consent for the specific purpose of ensuring safety and well-being, particularly for individuals who may be vulnerable, these measures are generally accepted. It's advisable to research local laws or consult with legal counsel if there are any doubts.

Choosing the Right Tracking Method

Selecting the most suitable tracking method involves a careful assessment of individual circumstances and practical considerations.

Assessing Individual Needs

The best tracking method will depend on the specific needs and capabilities of the elderly parent. For instance, someone with mild memory issues might benefit from a GPS smartwatch with an SOS button and geofencing. In contrast, a parent with advanced dementia who is prone to wandering might require a more robust, discreet GPS tracker with longer battery life and real-time tracking. Consider their willingness to adopt new technology, their daily routine, and the specific risks they face.

Budgetary Constraints

Tracking solutions vary significantly in cost, from free smartphone apps to expensive dedicated GPS devices with monthly subscription fees. It's essential to consider your budget when exploring options. Many basic GPS trackers or medical alert systems with location services are available at reasonable monthly rates, offering a good balance between cost and functionality. Prioritize features that are most critical for your parent's safety.

Maximizing Safety and Independence

The ultimate goal of tracking elderly parents' location is to enhance their safety while preserving their independence and dignity.

By leveraging the right technology or maintaining strong communication channels, adult children can gain

invaluable peace of mind. The key is to implement these measures collaboratively, with open dialogue and a focus on what is best for the elderly individual. Regular review of the chosen method and its effectiveness is also recommended, as needs can change over time. Ultimately, these strategies are about providing a safety net that allows seniors to continue living their lives with confidence and security.

FAQ

Q: What is the most discreet way to track elderly parents' location?

A: Discreet tracking often involves using small, wearable devices like GPS-enabled smartwatches or discreet GPS trackers that can be attached to keys or clothing. Smartphone apps can also be discreet if the parent consents to location sharing and keeps their phone on them.

Q: Can I track my elderly parents' location without their knowledge?

A: Legally and ethically, it is strongly advised against tracking your elderly parents' location without their explicit consent. Doing so can violate their privacy and damage your relationship. It's best to have an open conversation about your concerns and collaboratively decide on a tracking solution.

Q: What are the best GPS tracking devices for seniors?

A: The best GPS tracking devices for seniors often include features like real-time tracking, geofencing (setting up safe zones), an SOS button for emergencies, long battery life, and water resistance. Popular options include dedicated GPS trackers and GPS-enabled smartwatches.

Q: How can I track my parents if they don't have a smartphone?

A: If your parents don't have smartphones, you can use dedicated GPS tracking devices that do not require a smartphone for the wearer. These devices typically send location data to a web portal or a caregiver's phone app. Some medical alert systems also offer GPS tracking without the need for a smartphone.

Q: What are the privacy concerns associated with tracking elderly parents' location?

A: Privacy concerns include the potential for misuse of location data, the feeling of constant surveillance for the senior, and the security of the collected data. It's crucial to choose reputable services that prioritize data security and to have clear agreements on how and when location data is accessed.

Q: How can geofencing help in tracking elderly parents?

A: Geofencing allows you to set up virtual boundaries on a map around a safe area, such as their home or a regular walking route. If your parent's GPS device crosses these boundaries, you will receive an alert. This is particularly useful for individuals prone to wandering.

Q: What is the difference between GPS tracking and cell tower triangulation for location tracking?

A: GPS tracking uses satellites to determine a highly accurate location. Cell tower triangulation uses the signals from nearby cell towers to estimate a location, which is generally less precise than GPS. For tracking individuals, GPS is typically preferred for its accuracy.

Q: How often should I check my parents' location if I am using a tracking device?

A: The frequency of checking depends on the individual's needs and risks. For someone with mild memory issues, occasional checks might suffice. For someone with significant cognitive impairment or a history of wandering, more frequent or real-time monitoring might be necessary, especially when they are out and about.

track elderly parents location: Tracking People Anthea Hucklesby, Raymond Holt, 2023-08-30 Tracking technologies are now ubiquitous and are part of many people's everyday lives. Large sections of the population voluntarily use devices and apps to track fitness, medical conditions, sleep, vital signs or their own or others' whereabouts. Governments, health services, immigration and criminal justice agencies increasingly rely upon tracking technologies to monitor individuals' whereabouts, behaviour, medical conditions and interventions. Despite the human rights concerns of some organisations and individuals, most wearers and their significant others tend to welcome the technologies. This paradox is only one of the many fascinating challenges raised by the widespread use of tracking technologies which are explored in this book. This book critically explores the ethical, legal, social, and technical issues arising from the current and future use of tracking technologies. It provides a unique and wide-ranging discussion, via a cross-disciplinary collection of essays, on issues relating to technological devices and apps whose use is imposed upon wearers or suggested by others, whether agencies or individuals, including in the domains of

criminal justice, terrorism, and health and social care. Contributions from leading academics from across social sciences, engineering, computer and data science, philosophy, and health and social care address the diverse uses of tracking technologies including with individuals with dementia, defendants and offenders, individuals with mental health conditions and drug users alongside legal, ethical and normative questions about the appropriate use of these technologies. Cross-disciplinary themes emerge focusing on both the benefits of the technologies – freedom, improved safety, security, well-being and autonomy, and increased capacity of and efficiencies for public services – and the challenges – implementation and operational costs, mission creep, privacy concerns, stigmatisation, whether the technologies work as expected, and useability and wearability for all wearers. This book is essential reading for academics and students engaged in criminology, criminal justice, socio-legal studies, science and technology studies, medicine, health and social care, psychology, engineering, computer and data science, philosophy, social policy and social work and security studies. It will also be of great interest to policy-makers, regulators, practitioners already deploying or considering using tracking technologies, and to current and potential wearers.

track elderly parents location: *Race and Family* Roberta L. Coles, 2006 The author provided interesting, original examples which I found engaging. . . . I think the biggest strength is avoiding the 'one ethnicity per chapter' approach found in so many books on family diversity. I like the structural approach. - Hilary A. Rose, Concordia University A very useful book as a companion text for courses on race and ethnicity....The chapters are easy to follow for undergraduate students. - Renxin Yang, Northern Michigan University I think the book is needed because there are limited choices currently available and this book is moving in the right direction....A strength is that it is not an edited book like so many other books on this topic. There is a need for detailed study of ethnic minority families, and I am excited about making this book my required text for my Ethnic Families Course. - Cheryl Burgan Evans, Miami University I find the emphasis on social structure particularly appealing. To date, I have used Taylor's [edited] book, which depends on the instructor to provide all of the integration. - Gretchen Cornwell, Pennsylvania State University In *Race and Family: A Structural Approach*, author Roberta L. Coles looks at ethnic minority families in a novel way--through a structural lens. Unlike many texts on race and family, this book offers an approach that illustrates overarching structural factors affecting all families as opposed to examining each ethnicity in isolation from one another. By focusing on various structural factors such as demographic, economic, and historical aspects, this book analyzes various family trends in a cross-cutting manner to exemplify the similarities and distinctions among all racial and ethnic groups. Key Features: Establishes commonalities and differences across various cultures within American society in an approach that enables students to better compare and contrast different ethnic groups Covers multiracial families, in addition to traditional ethnic groups such as African American, Native American, Latino American, and Asian American, to provide the most contemporary examination of American families Uses the latest research and Census data to present a relevant assessment of trends in family structure, gender relations, intergenerational relations, family violence, acculturation, interracial marriage, and adoption in an increasingly diverse American context Includes an annotated listing of suggested videos, autobiographies, articles, and Web sites students can explore for further information *Race and Family* is a brief core textbook designed for advanced undergraduate and graduate students studying ethnic minority families and family diversity in the departments of Human Development & Family Studies, Family & Consumer Sciences, and Sociology.

track elderly parents location: *The Family Track* Constance Coiner, Diana Hume George, 1998 At a time when the academy is an ever more demanding arbiter and shaper of the lives of those it employs, this book discusses the challenges and benefits of balancing a rewarding professional life with the competing needs to nurture children, care for aging parents, and engage in other personal relationships.

track elderly parents location: *In the Country of the Old* Jon Hendricks, 2019-03-29 Aging is a universal experience, and an individual one. But it is also a cultural phenomenon. Our ethnic and

social background has a strong influence on how we deal with growing old. This collection draws on research from around the world to explore how cultural context shapes and defines the aging process. Studies examine differing patterns in the lives of the aged in Portugal, Polynesia, Sweden, and Israel, and among ethnic groups in the United States.

track elderly parents location: Help Me Find My Brother Maria A. Colavita, 2020-12-09

Help Me Find My Brother is a memoir about Maria Colavita's relationship with her brother Angelo. It details the journey she and her parents endured as they discovered the person he had become and uncovered his years of self-destructive, addictive behavior and the resulting tragic accidents. Growing up in an Italian American house, Maria and Angelo's loving parents worked hard to provide many good opportunities for their children. Maria enjoyed the brighter opportunities that came her way; but struggled to understand why Angelo chose the darker path of life. Her fun loving, intelligent brother was lost to the world of drug addiction. Maria has worked for the past 40 years to help Angelo; trying to steer him toward a life with a brighter future. She's shared her story of how an ordinary traditional family with old school values understood and handled their lost son and brother. *Help Me Find My Brother* is Maria's attempt to understand the difference between Angelo's drug addict lifestyle and his traumatic brain injuries and mental illness. While she may not have gotten her fun-loving brother back, she became a much better sister and daughter because of this journey.

track elderly parents location: Ageing Issues and Responses in India Mala Kapur

Shankardass, 2020-06-23 This book discusses emerging issues concerning ageing in India, describes the multi-layered vulnerabilities of older adults in the context of health care and caregiving, and explores social, legal and economic perspectives. It also analyses the existing policies and programmes intended to address these age-related issues and assesses the importance of preventive geriatrics towards active ageing, as well as the current scenario of institutional care for the elderly in India. Gathering fifteen chapters written by leading researchers in the fields of geriatrics, social work, anthropology, sociology, psychiatry, economics, law and mental health, the book presents the latest findings on ageing-related topics such as elderly health, family change, old age homes, age friendly environments and the role of integrative medicine. Accordingly, it offers a valuable resource for researchers, academics, practitioners and policymakers in the areas of gerontology, demography and sociology, as well as all those interested in the study of ageing populations.

track elderly parents location: Family Ties and Aging Ingrid Arnet Connidis, Amanda E.

Barnett, 2018-10-05 Providing an integrated and thorough representation from current research and contemporary society, *Family Ties and Aging* shows how pressing issues of our time—an aging population, changing family structures, and new patterns of work-family balance—are negotiated in the family lives of middle-aged and older adults. Focusing on key questions such as How do current trends and social arrangements affect family relationships? and What are the implications of what we know for future research, theory, practice, and policy?, authors Ingrid Arnet Connidis and Amanda E. Barnett explore groups and relationships that are typically overlooked, including the unique family situations of older single and childless persons, sibling ties, older lesbian and gay adults, and new forms of intimate relationships. The Third Edition is thoroughly updated to include the latest research and theoretical developments, recent media coverage of related issues, and new information on intimate relationships in later life and elder neglect/abuse.

track elderly parents location: Find Your Own Path Fiona Buckland, 2023-03-16 Embark on a journey to living your most fulfilling, authentic life with the help of life coach Fiona Buckland

_____ You are not in the waiting room of life. This is it. You sense you have more potential, more to give to your life, more of you - but the way forward isn't clear. You're not alone. This is a practical guide to fulfilling your potential and living authentically - to finding your own path in life, based not upon fleeting happiness, but on fulfilment and meaning. Life coach Fiona Buckland expertly guides you through twelve key steps, using reflections, activities and insights from her coaching casebook and her own personal experience to keep you going on this journey. You'll discover how to

Separate From Your Old Scripts · Build Your Compass · Make Peace With Inner Critics & Saboteurs · Find Allies · Replenish your Energy · Make Better Decisions · Nurture your Ideas · Raise Your Resilience · Tell Your Story It takes inner work to make outer change. What you'll learn from this book will transform your life in ways you might not yet be able to imagine. _____

track elderly parents location: *My Parents Got Old! Now What Do I Do?* Janine Brown, 2015-11-06 An aging population means an increasing number of children take care of their parents. While adult children have been their elderly parents caregivers for generations, those in that role today face challenges others have not. Its no wonder many feel overwhelmed and stressed when they first take responsibility for those who once took care of them. Author Janine Browns *My Parents Got Old! What Do I Do? A Practical Guide to Caring for Your Aging Parents* helps you face and get through the issues surrounding your role as adult child and parental caregiver. Brown is not a lawyer, accountant, or doctor. She writes from the personal experiencehers and othersof caring for aging parents. She shares information to help caregivers and potential caregivers assess needs and skills necessary to providing their parents with the best possible care. Through her experiences, youll gain an understanding of what happens in real life; Brown takes caregiving beyond the theoretical to the practical. Checklists help you stay organized, which can be very helpful in situations with heightened emotions. Youll appreciate the authors holistic approach to the adult caregiving, including chapters on family ties and the emotional reality of what is to come. Theres no doubt caring for an elderly parent can be difficult and trying. With *My Parents Got Old! Now What Do I Do? A Practical Guide to Caring for Your Aging Parents*, you wont be alone on this journey. Youll have the benefit of others who have been there.

track elderly parents location: *Oxford Textbook of Migrant Psychiatry* Dinesh Bhugra, 2021-02-04 Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them. Stress related to migration affects migrants and their extended families either directly or indirectly. The process of migration is not just a phase, but leads on to a series of adjustments, including acculturation, which may occur across generations. Factors such as changes in diet, attitudes and beliefs, and overall adjustment are important in settling down and making the individuals feel secure. This period of adjustment will depend upon the individual migrant's pre-migration experiences, migration process and post-migration experiences, but also upon an individual's personality, social support and emotional response to migration. Socio-demographic factors, such as age, gender, educational, and economic status will all play a role in post-migration adjustment. In order to understand the impact on individuals, not only the type of migration and different stressors, but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored. Despite the number of refugees and asylum seekers around the world increasing at an astonishing rate, the mental health needs of migrants are often ignored by policy makers and clinicians. The *Oxford Textbook of Migrant Psychiatry* is designed to serve as the comprehensive reference resource on the mental health of migrants, bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals. Individual chapters summarise theoretical constructs related to theories of migration, the impact of migration on mental health and adjustment, collective trauma, individual identity and diagnostic fallacies. The book also covers the practical aspects of patient management including cultural factors, ethnopsychopharmacology, therapeutic interaction and therapeutic expectation, and psychotherapy. Finally, the book will examine special clinical problems and special patient groups. Part of the authoritative *Oxford Textbooks in Psychiatry* series, this resource will serve as an essential reference for psychiatrists, mental health professionals, general practitioners/primary care physicians, social workers, policy makers and voluntary agencies dealing with refugees and asylum seekers.

track elderly parents location: *International Handbook on the Economics of Migration* Amelie F. Constant, Klaus F. Zimmermann, 2013-09-30 ŠThis is an extremely impressive volume which guides readers into thinking about migration in new ways. In its various chapters,

track elderly parents location: China's Grandmothers Diana Lary, 2022-04-21 Over the past century and a half, China has experienced foreign invasion, warfare, political turmoil and revolution, along with massive economic and technological change. Through all this change there is one stable element: grandmothers, as child carers, household managers, religious devotees, transmitters of culture, and above all, sources of love, warmth and affection. In this interdisciplinary and longitudinal study, China's Grandmothers sheds light on the status and lives of grandmothers in China over the years from the late Qing Dynasty to the twenty-first century. Combining a wide range of historical and biographical materials, Diana Lary explores the changes and continuities in the lives of grandmothers through revolution, wars, and radical upheaval to the present phase of economic growth. Informed by her own experience as a grandchild and grandmother, Lary offers a fresh and compelling way of looking at gender, family, and aging in modern Chinese society.

track elderly parents location: The Wild Geese are Tracking Again Hubert Luken, 2020-10-22 This book is a true tale of a large family in war-torn Germany during and after World War II. It is a story that is told through the eyes of a child of the hardships suffering and death that this family endured in order to survive a Nazi regime and a Russian occupation. It explains their harrowing journey across a country and then across the world as well as how this family continued to keep their faith alive. The Wild Geese Tracking was a hopeful sign for a young boy which followed him throughout his life.

track elderly parents location: Cultural Reverse Xiaohong Zhou, 2022-07-30 The phenomenon of Cultural Reverse (文化反哺) emerged in the 1980s after China's reform and opening up. In this era of rapid social change, the older generation started to learn from the younger generation across many fields, in a way that is markedly similar to the biological phenomenon of The old crow that keeps barking, fed by their children from ancient Chinese poetry. In this book, the author discusses this new academic concept and other aspects of Chinese inter-generational relations. In the first volume, the author explains some popular social science theories about generations, traces the history of Chinese intergenerational relationships, and through focus group interviews with 77 families in mainland China, comprehensively discusses the younger generation's values, attitudes, behavior patterns and the ways which differ from their ancestors'. Following on from the first volume, this second volume further analyzes the multiple causes of cultural reverse, including rapid social change, the influence of peer groups, and the impact of the media. Then, in a broader context, the author discusses the complex interdependence of and conflict among the state, society and youth. He tells a story of the transformation of Chinese youth over the past hundred years, and names this one-place (fast-changing China) and one-time only (unrepeatable) phenomenon China feeling. The book will be a valuable resource for scholars of Chinese sociology, and also general readers interested in contemporary Chinese society.

track elderly parents location: Status of the Family Farm and the Prospects for the Future United States. Congress. House. Committee on Agriculture. Subcommittee on Forests, Family Farms, and Energy, 1988

track elderly parents location: Handbook of Social Work in Health and Aging Barbara Berkman, 2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care, aging, and social work in a single, authoritative volume. These areas are too often treated as discrete entities, while the reality is that all social workers deal with issues in health and aging on a daily basis, regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic, and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews, written by the most experienced and prominent gerontological health care scholars in the United States and across the world, provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families; new models

for intervention in both community-based practice and institutional care; and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.

track elderly parents location: No Place Like Home Christopher Carrington, 1999 In the rich, often surprising portrait of the everyday world of lesbian and gay relationships, Christopher Carrington captures the experiences of creating and maintaining a home and a chosen family. Observing lesbians and gay men as they go about their daily routines, Carrington unveils the complex, frequently hidden, and sometimes artful ways that gay people make a family and home for themselves.

track elderly parents location: *Elderly Parent Caregiver Guide* HowExpert, Rebecca Rehak, 2019-08-08 Elderly Parent Caregiver 101 is the ultimate guide for adult children who are or will become their parents' caregivers. Filled with valuable information and ideas, this book offers hope, support, and plenty of practical advice for anyone caring for their elderly parents. Each chapter describes a different area of caregiving, including: • Becoming a Caregiver • Medical Providers • Facility Care • Caregiver Support • Financial Concerns • Medical Devices • Special Circumstances • End of Life As the author guides you through the maze of caregiving, she shares her knowledge as a nurse and examples from her own journey of caregiving for her elderly parents. This book defines medical terms, explains insurance options, and highlights the many tools available to caregivers. Through these topics, you'll gain the understanding needed to be a caregiver for your elderly parents. Each section offers helpful information and true insights only a caregiver can provide. The tips in every chapter are practical facts and advice for every area of your caregiving. You are not alone in your caregiving journey. Don't struggle without having the best resource for knowing everything you need to know about caring for your elderly parents. This guide is your trusted companion for that journey. About the Expert Rebecca Rehak, LPN, is a nurse, writer, and public speaker who has worked in the medical field for over 20 years, including kidney dialysis, community health, and Memory Care. As a public speaker, she helped advance programs for dialysis access care and currently teaches science camps for children. Her work has touched the lives of thousands of people. After caring for both her elderly parents, she now devotes much of her time to writing articles, blogs, and providing support for other caregivers. She and her husband live with their big, furry dog in Wisconsin. The author would like to thank the doctors and staff at Froedtert Hospital, the Medical College of Wisconsin, and Horizon Home Care and Hospice for the wonderful care they provided to both her parents. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday experts.
